1. EXECUTIVE SUMMARY

1.1 INTRODUCTION

Keshav Memorial Institute of Technology (KMIT), a self financing institute in the state of Telangana, was started in the year 2007. KMIT is a part of Keshav Memorial Education Society, a versatile educational Society dedicated in imparting value based education. The college was started in the heart of Hyderabad city with the purpose of enabling the students to utilise their graduation years to the maximum extent, the vision to which the college is highly committed.

KMIT has state of the art infrastructure in a huge campus which though is in the city is serene and peaceful. The institute has Finishing School which is the greatest asset as this makes the students industry ready. Other programs unique to KMIT include: TESSELLATOR, TeleUniv, Trishul and SONET

TESSELLATOR is KMIT's learning management system. After each programming class, students are required to take a quiz and Programming test.

KMIT **Tarang** is a Radio service from KMIT. **KMIT TV** is another prestigious project. 500 Hours of recorded content ranging from academic to industry related courses is available for usage on KMIT TV. It has Videos of live class room lectures.

To provide best service to all stake holders of KMIT, special Android Apps --**Sanjaya App** for parents, **Drona App** for teachers and **Netra App** for students are developed.

KMIT encourages co-curricular and extra- curricular activities KMIT is also committed to encourage research work for which a separate R&D centre has been established with state of art technologies.

KMIT also has excellent sports facility. Basketball, Football, VolleyBall, Shuttle Badminton courts indulge the students in outdoor sports, Chess, Caroms, Table tennis and Badminton courts in indoor sports. Students and Faculty are members of various Professional bodies and are actively involved in their activities.

The institute is keen to produce socially conscious engineers, with the basic ethics and values to meet the current challenging innovations of the modern world. KMIT also imparts the behavioural and leadership skills along with excellent communication skills, analytical skills, so that they are able to take up challenges, prove to be an asset in which ever sector they work.

Vision

To be the **fountain head of latest technologies**, producing highly skilled, globally competent engineers.

Mission

- * To provide a learning environment that **inculcates problem solving skills, professional, ethical responsibilities, lifelong learning** through multi modal platforms and prepare students to become successful professionals.
- * To establish **Industry Institute Interaction** to make students ready for the industry.
- * To provide **exposure to students on latest hardware and software** tools.
- * To **promote research based projects/activities** in the emerging areas of technology convergence.
- * To encourage and enable students to not merely seek jobs from the industry but also to create new enterprises
- * To induce a **spirit of nationalism** which will enable the student to develop, **understand India's challenges** and to encourage them to develop effective solutions.
- * To **support the faculty to accelerate their learning curve** to deliver excellent service to students

1.2 Strength, Weakness, Opportunity and Challenges(SWOC)

Institutional Strength

- One of the best JNTU affiliated colleges in providing engineering education.
- Consistently good academic performance.
- Retention of experienced, dedicated, qualified faculty.
- Pro active and Participative Management.
- Excellent placement with high grade pay package.
- Finishing school to make the students Industry ready.
- Enhancing the employability skills of the students.
- Student's attendance, evaluation process, mentor reports, staff and student profile are done digitally through the Apps developed exclusively for KMIT. This is for the easy and effective monitoring.
- Encouraging the students to develop a holistic personality.
- Innovative teaching –learning practices.
- Project based learning approach.
- Research and development cell.
- Workshops, Conferences, Seminars, Symposia are interspersed every year
- MoUs with reputed Industries and organisations are signed to bring them strategically closer.
- Well equipped labs and library.
- SANJAYA App made the parents as an active partner in the holistic development of their wards.
- Industrial visits are regularly arranged for our students in organizations like –Genesis Solutions Pvt Ltd, Teleparadigm Networks Ltd, Genweb Technologies Pvt Ltd, Inferdata Software India Pvt Ltd etc.
- Students have undergone internship programs in reputed organizations like Amazon, Persistent Systems, Value Momentum, OpenText, GGK Technologies
- Appointing mentors for the students.
- Many students pursue Post Graduate course in some of the top ranked foreign universities
- The college has established the IEDC (Innovation and Entrepreneurship Development Cell)
- Sports Facilities.

Institutional Weakness

- The departments need to become “Research Centres” recognized by the affiliated University.
- Less number of sponsored research programmes
- Number of MOU’s with Industries for training students, needs to be enhanced
- Intricacy in attracting core companies for some branches of Engineering.
- Publication in indexed journals

Institutional Opportunity

- R&D, Product development, Patent, Technology transfer, Start-ups etc.
- Student development and Entrepreneurship
- More Industry Institution interaction
- Inter disciplinary curriculum and research
- Develop consortium approach with other eminent Institutions
- Develop the scope for inter disciplinary and collaborative research.
- Develop the resources for renewable energy.
- Exploring more opportunities for Research projects
- Alumni association is formed and it is active in improving the standards of students.
- Community development and outreach
- Develop consortium approach with other eminent Institutions
- Develop the scope for inter disciplinary and collaborative research.
- Develop the resources for renewable energy.

Institutional Challenge

- Motivating and converting more number of students towards entrepreneurship.
- Product development and patenting
- Outreach activities (Online examinations, Competitive examinations)
- Global and National level competitions
- Motivating and converting more number of students towards entrepreneurship.
- Enhancing the number of students opting for higher studies in prestigious institutions in India and abroad

1.3 CRITERIA WISE SUMMARY

Curricular Aspects

KESHAV MEMORIAL INSTITUTE OF TECHNOLOGY, KMIT, is an institute of strong repute in the state of Telangana. The institute is affiliated to JNTUH. KMIT as it is popularly called, is a self financing institute, follows the curriculum designed by the University. The institute has departments of CSE, ECE, IT, EIE based on the core specialization, but the departments work together to achieve the vision and mission of the institute.

Effective curriculum delivery is ensured through a process as given below:

- Advance planning of academic activities.
- Formulation of objective driven teaching plan.
- Preparation of adequate learning materials.
- Maintenance of course files by faculty.
- Remedial Classes for slow learners.
- Mentor system to monitor and resolve problems related both academic growth and personal of students.
- Periodic review of teaching-learning process by the Principal.
- Systematic examination process with regular updates to parents through SANJAYA App.
- Guest lectures, seminars, internships and training programs.
- Refresher Courses, workshops and FDPs to upgrade faculty's skills.
- More than 60% of full time teachers have participated as members in various bodies of the Universities, Autonomous and Affiliated Colleges.
- Nearly 12% new courses were introduced during the last 5 years.
- CBCS was introduced by JNTUH in all UG programs from the academic year 2016-2017.
- More than 60% of students have enrolled in Add-on programmes in the last 5 years.

Efforts relevant to gender-equality, environment, human values and professional ethics:

- Equal opportunities in terms of admissions, employment, training programs, sports activities etc.
- Women faculty and students participate in programs of women empowerment etc.
- Curriculum includes courses on Professional Ethics, human rights and Environmental Science.
- 88 value-added courses imparting transferable and life skills.
- Every year more than 90% of final year students have undertaken internships.
- Structured feedback received from students, teachers, etc on design and review of syllabus.

Teaching-learning and Evaluation

The traditional method of teaching is blended with the contemporary technology. TESSELLATOR, unique mechanized evaluation software, contributes immensely to the evaluation process. Efficient faculty, conducive learning environment helps in attaining the vision and mission of the institute.

- The admission process is as per the Telangana state policy. Policy encourages admissions to Telangana state only. Average percentage of students from other states is 0.32%
- Average enrollment percentage is 98.96%
- All the seats under reservation category gets filled every year.
- Special programs arranged for advanced learners and slow learners after due assessment.
- Student-full time teacher ratio is 15:1
- Percentage of Divyangjan students on rolls is 0.04%
- Student-centric methods applied for enhancing learning experiences.
- All the faculty use ICT for effective teaching with LMS, e-learning resources etc.
- Each mentor on an average has approximately 15 students under his/her care for academic and stress related counseling.
- Smart Classrooms project activities and industrial internships contribute to innovation and creativity in

teaching-learning.

- All the sanctioned posts are filled with full time teachers.
- Average percentage of full time teachers with Ph.D is 10.94%
- Average teaching experience of full time teachers is 8.5 years.8
- Average percentage of full time teachers who received awards and recognition is 27.51%
- 13.22% of full time teachers are from other states.
- Even the assessment is carried on in the laboratory sessions, depending on these outcomes major decision of improving the teaching –learning process are taken. Continuous Internal Evaluation system is done using both University examinations and TESSELLATOR based evaluation.
- Mechanism of internal assessment is transparent and robust. TELESCOPE, special software, is used to do day to day evaluation.
- Mechanism to deal with examination-related grievances is transparent, time-bound and efficient.
- Teachers and students are made well aware of program outcomes and course outcomes. The Institution evaluates the attainment of these outcomes.
- Average pass percentage of students is 83.05%.

Research, Innovations and Extension

The R&D center, meticulously works towards the research and development sector. The students as well as the faculty are given the opportunity to take up research. The faculty is given permission to attend conference, seminars, present papers, and to be the resource persons for national and international conferences, and workshops.

KMIT upgrades infrastructure by providing space for project laboratory, research laboratory. Every year a specific amount of money is allocated to purchase equipment and software for the research.

The various parent/student/teacher service apps like Sanjaya, Drona, Netra are developed by the faculty and students. These apps are user friendly and have brought a remarkable change in the routine student monitoring system.

- Nearly Rs 74 Lakhs worth research/sponsored projects were taken up by the KMIT staff.
- An average of 0.32 projects per faculty are funded by government and non-government agencies.
- The Institution has in place an ecosystem for innovation and other initiatives for creation and transfer of knowledge.
- KMIT has established Institution Innovation Council (IIC).
- Workshops/seminars are conducted on Intellectual Property Rights and Industry-Academia innovative practices.
- The Institution has a stated code of ethics to check malpractices and plagiarism in research.
- Teachers who received state, National and International Recognition are awarded with incentives.
- 41 different extension activities were conducted by KMIT leading to a notable impact on the community as well as participating students regarding social issues.

- KMIT has received 16 awards from the government/recognized bodies.
- In the last five years KMIT has conducted nearly 400 programs including student internships, on-the-job training and research.
- KMIT has signed 89 functional MOU's with Institutions of national and international importance.

Infrastructure and Learning Resources

The faculty is provided spacious staff rooms and has an easy access to the internet to upgrade their knowledge and enhance their teaching skills. The lab software is upgraded in accordance with the syllabus. The equipment is monitored by the maintenance team; the equipment is replaced as and when required. The entire campus is under CC camera surveillance, the footage of it is closely monitored.

Adequate facilities for teaching-learning are available as given below:

- There are 34 class rooms out of which 19 are with ICT facilities.
- 3 seminar halls with ICT facilities
- One auditorium with 1000 seating capacity.
- A Studio with all capturing facilities.
- R&D Center
- One Computer Centre with 50 systems
- 1 Central Library.
- The institution provides indoor game facilities for Table Tennis, Shuttle Badminton, Caroms and Chess. The institution has adequate playground for outdoor games like Volley ball, Basket ball and Foot ball.
- Provision of rooms for practice of cultural activities.
- Library automated by Integrated Library Management System (ILMS), has a total collection of 16964 books, printed journals and on-line journals.
- An average annual expenditure per year of Rs. 6.94 Lakhs for purchase of books and journals.
- Remote access available to the e-resources in the library.
- Per day usage of library by teachers and students is 9.3%.
- Student-Computer ratio is 4.2:1
- Two Leased lines of Internet Connectivity with a bandwidth of 150 MBPS.
- The average expenditure on maintenance of campus infrastructure is 28.98%.
- Established systems and procedures available for maintaining and utilizing physical, academic and support facilities.

Student Support and Progression

Institute has an annual intake of 660 first year students since 2014.

- 36.94% of students per year benefitted through the scholarships from the government and 60.73% of students per year through the freeships from the Institution.
- Every year nearly 85% of final year students are benefitted through guidance for competitive examinations and career counseling.
- Remedial coaching provided for slow learners by conducting special classes.

- Bridge Courses conducted in communication skills and programming concepts .
- KMIT has dedicated Yoga teacher to assist students in practicing Yoga and Meditation.
- Personal counseling is a core activity of every teaching staff as a mentor. Apart from the faculty mentors, the institute has an in house clinical psychologist, who addresses the students who have various issues even at the personal level.
- Students are trained on Vocational programs like Basic Electrical Works, Computer Networking, Web Designing etc.
- Transparent mechanism for timely redressal of student grievances.
- BHAVISHYA DWAAR, the placement cell provides the training to make the students ready for the industry. The training is provided in the School of New and Emerging Technologies (SONET) and finishing school. The training is also done on a customized basis. An average of 81% of outgoing students gets placements and 5.27% of students' progress towards higher education.
- An average of 89.7% of students qualifies in GATE, GMAT, CAT, GRE, TOEFL etc.
- In the last 5 years students won 64 awards for outstanding performances in Sports/cultural events at National/International levels.
- A total of 66 events in sports and 74 cultural competitions organized in five years.
- Alumni meet annually to share their views and give suggestions. They deliver guest lectures and seminars also help juniors in projects, internships and placements.

Governance, Leadership and Management

The vision and mission are framed in accordance with the various government and higher education policies. The institute works towards realizing the vision and mission of the institute.

The management closely monitors the day to day activities, to initiate the realisation of the vision and mission. Strategic planning decision making policies are framed by the Directors, Principal, Heads of the Department, to bring out the policies for upholding the teaching learning process.

- The Governing Body meets periodically to monitor progress and suggest strategies.
- The Principal and the Heads of the department periodically meet to take decisions on academic matters. The Head of the department decides on the activities of the department and delegates responsibilities to the faculty.
- Staff and students permitted to give suggestions- an example of participative management.
- Community service like Swach Bharath, Computer Basics for Senior Citizens, Blood donation camps, Medical checkups, Awareness rallies are organized by KMIT.
- The students are involved in the various students clubs; they carry out the activities of the club and seek the advice of the faculty in-charge. The students are also encouraged to contribute their work to the e-magazine K-Mitra. These activities make them develop leadership qualities.
- Effectiveness of various committees in the implementation of minutes evidenced.
- Welfare measures for teaching and non-teaching staff and cash awards, sponsorships, incentives, etc. are part of KMIT.
- On average 5 professional development programs are arranged per year for the development of staff.
- 63% of teachers provided with financial support for attending conferences etc.
- The IQAC focuses on the continuous improvement of the academic system.
- The institution has organized International Conference on Fog Computing and Internet of Things 2017 (ICFCIoT 2017) which was conducted by Computer Engineering Department on 21st -22nd December 2017. Total number of 64 faculties and 130 students participated in conference and 25 papers were

presented and published.

Institutional Values and Best Practices

The institute is committed in making the students best citizens. The Institute adopts the various steps to maintain the eco-balance like the water-harvesting, no to plastic, plantation are few of them.

The Institute also teaches the students to contribute to the cause of the society; programs like Swachhata Abhiyaan, pulse polio campaign, teaching the senior citizens, charity for the home for the aged, blood donation camps, organ donation campaign are encouraged. The vision and mission are framed in accordance with the needs of the industry, and higher education policies of the government. The institute works towards realizing the vision and mission of the institute.

- KMIT has organized 25 gender-equity promotion programs.
- Nearly 41% of lighting power met is by LED bulbs.
- The issues of waste production and disposal efficiently managed.
- Rain-water Harvesting system in place. The institute has rainwater harvesting facility at two locations in the campus. The rain water from the building roof is connected to one facility and the rain water from the open sky is sent to other facility.
- KMIT spends 2.89% of the total expenditure on green initiatives and waste management.
- Resources are available for Divyangjan in KMIT.
- Initiatives are taken up to address location advantages and disadvantages.
- KMIT has its own Code of conduct-book.
- KMIT has organized 37 programs to increase awareness on fundamental duties and constitutional obligations, national values, human values, national integration, communal harmony
- The Institution aims to focus on futuristic demands of the society as well as the holistic development of the student.

4. Quality Indicator Framework(QIF)

Criterion 1 - Curricular Aspects

1.1 Curricular Planning and Implementation

1.1.1 The institution ensures effective curriculum delivery through a well planned and documented process

Response:

Keshav Memorial Institute of Technology (KMIT) is affiliated to Jawaharlal Nehru Technology University, Hyderabad and follows the curriculum prescribed by the University. The academic calendar of the University is strictly followed. An active plan for timely implementation is formulated by the institution to ensure effective delivery.

An academic Council, consisting of the Heads of department, external members, Industry experts, Alumni and headed by the Principal, prepares policies after strategizing the best methods to successfully implement the curriculum. Faculties are encouraged to prepare an active plan, known as lesson plan, for their classroom teachings of the entire semester even before the semester commences. The preparation of lesson plan helps in effective distribution of syllabus and timely completion of the course.

The teaching plans are prepared by the respective faculty who are in charge of the subjects. The subjects are allotted after careful consideration of experience, subject specializations and performance. The respective teacher of the subject prepares teaching plans, course material, class notes and PPT presentations in order to be fully prepared for teaching. The predefined planning for the successful execution of teaching with the objective of Outcome-based education (OBE) is carried out.

To support the faculty in effective implementation of the lesson plan KMIT has special automation software and Apps. A special App, called DRONA, helps faculty to upload the student attendance and syllabus coverage details instantly from the class room. The uploaded information is accessible to all stakeholders viz parents, management and students. The teacher uploads the syllabus completed in class every day on the DRONA App to ensure timely check on the syllabus coverage and implementation of the planning done by the department.

Along with the University prescribed internal exams, continuous evaluation is carried out by conducting unit wise tests after completion of every unit to ensure thorough understanding. Transparency and impartiality are maintained in the evaluation process. Valued answer scripts are shown to the students with suggestions to improve further.

KMIT has special software tool, called Tessellator, used to assess the programming skills, experimental capabilities and to conduct online tests. Tessellator has another feature i.e virtual communication with students. With this feature of virtual communication KMIT conducts online classes on the days of unexpected physical class cancellations. This helps in effective teaching and learning process and thus ensures better results.

Students have both online and off line Library access. Students and faculty are provided with remote access to e-resources of the library so that they can access e resources from any where.

1.3 Curriculum Enrichment

1.3.1 Institution integrates cross- cutting issues relevant to Gender, Environment and Sustainability, Human Values and Professional Ethics into the Curriculum

Response:

The Institution believes that integrating cross cutting issues with the curriculum would create positive effect on the student both in terms of education and societal commitment. Accordingly courses on gender sensitization, environment and sustainability, human values and professional ethics are offered by the University are well taught. To supplement this, the institute conducts several awareness sessions and related activities.

Gender Sensitization

Under the compulsory course **Gender Sensitization Lab**, students will be sensitized to basic dimensions of the biological, sociological, psychological and legal aspects of gender. This will be achieved through discussion of materials derived from research, facts, everyday life, literature and film. The students are addressed in bilingual languages and different styles of communication to ensure complete understanding. Students are informed about the legally enforced gender equality policies that are mandated in all work places. The growing importance of gender equality is communicated effectively to the students through this course. The students are acquainted with the concepts of feminist relationships, responsibilities and gender identities. Students will develop a sense of appreciation of women in all walks of life. In addition to regular University curriculum, KMIT also conduct special programs that highlight the importance of gender equity.

Environment and Sustainability

The importance of saving our ecosystem is more critical today than ever. JNT University curriculum has a compulsory paper, Environmental **Science and Technology** to make the citizens of tomorrow realize their duties. This course gives a complete understanding of our ecosystem, natural resources, bio diversity, biotic resources, pollution due to various factors and its management. Environmental protection policies as well as the regulations, related to the environment, are also included in the syllabus to make the students fully aware and responsible of their surroundings. This course helps the engineering graduates to understand/evaluate/develop technologies based on ecological principles and environmental regulations which in turn help in sustainable development. In addition to curriculum KMIT conducts special programs like Harita Haram (Tree sapling plantation program – an initiative by Government of Telangana state), Swach Bharath. Students and staff take active participation in these programs. KMIT also maintains Green campus.

Human Values and Professional Ethics

This course is introduced to the students with a vision to provide the essential complements to their educational skills taught as a part of the core syllabus and the necessary human values imparted by the institution. This course enables the students to understand the importance of Values and Ethics in their personal lives and professional careers. It ensures a positive perspective towards life, career and happiness among students. The students will know the rights and responsibilities as an employee, team member and a global citizen. Highlighting plausible implications in terms of ethical human conduct, mutually satisfying human behaviour and trustworthy interaction with the world, this course allows the students to be completely ready to face the professional world.

2.2 Catering to Student Diversity**2.2.1 The institution assesses the learning levels of the students, after admission and organises special programs for advanced learners and slow learners****Response:**

Understanding the unique needs of every student, the institution facilitates special learning, based on the academic capabilities of each student by fairly analyzing their learning methods post admission. The institution identifies these students into two broad categories by organising special programs and devises special methods to derive maximum outcome from each group.

Advanced learners: The advanced learners are identified based on the assessments by individual teachers, previous academic credentials, EAMCET rank, skill tests and personal interviews. Through a wide spectrum of tests, quizzes and group discussion, the classroom performance of each student is individually tested. Through this process, the faculty accurately identifies the advanced learners. Once they are identified, they are encouraged to work focused in ways that suit their progress. Certification programs, projects beyond curriculum are offered to the advanced learners. Those who require funding for experimental work and projects are also assisted to enhance their academic skills and learning. The grouping of these advanced students is done in such a way that they work together on projects to share their knowledge and utilize their maximum potential. To enable students to gain knowledge beyond their curriculum, the college allows advanced learners to attend several technical/skill based/value added workshops and national conferences. Similarly, the college also offers optional Training/Certification programs related to core subjects. Students are also motivated to design and develop solutions to community related problems. Students are also encouraged to register and participate in events organized by professional bodies like IEEE (Institute of Electrical and Electronics Engineers), CSI(Computer Society of India), and IETE(Institute of Electronics and Telecommunication Engineers). Apart from academics, student achievers from different fields are also encouraged. Students excelling in extracurricular activity

are encouraged and supported by the institute to accomplish their goals. Necessary facilities are provided.

Similarly slow learners are also identified based on the academic performance in tests and on term examinations conducted by the University. Tutorial classes are conducted in every subject to improve their grasping abilities and improve their academic performance and involvement in class activities. All topics are taught again based on the student's needs and requirements. Remedial classes are arranged after the college hours to help these students clear their backlogs without any difficulty. Follow up tests are conducted at the beginning of every academic year / semester. Based on the result of these tests, bridge courses are conducted in the respective domain for the next one week. Personality Development Programs are also conducted to motivate these students and inspire them to work harder. These classes help build the confidence level of these students by allowing them to practice and overcome their weaknesses. Through these helpful steps, KMIT grants extra attention to slow learners and enables them to be at par with their counterparts. This ensures that the whole class fully grasps the concepts taught by teachers instead of a selected handful of them.

Weakly twice counsellor Ms. Kiran is available on campus to cater the needy students.

2.3 Teaching- Learning Process

2.3.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences

Response:

Experiential Learning: The students are taught to practically test the concepts that they theoretically learn in classrooms. This enhances their practical knowledge and tests the concepts acquired by them. Faculty and Qualified Technical Staff help the students to conduct experiments. Students are given time slots to do additional and riveting experimental work with the assistance of the highly qualified staff. Institution has established a digital library for the ease of the students. Stocked with several books, journals, magazines and e-magazines, this facility is a boon for any student willing to find a text or reference. Online resources are also provided. This widens the scope of learning beyond the syllabus. Several hands on experience sessions are arranged with industry experts to provide the students interaction with the current technology. Through these sessions, students understand the practicality and implementation of the concepts studied by them. Students are also encouraged to intern during academic semesters. The faculty encourages as well as provides students with opportunities to intern with the industry of their choice. This allows them to gain firsthand experience of the environment in which they further want to pursue their career.

Participative Learning: Different methodologies that include Cooperative, Collaborative, Project Based and Problem Based are used to accelerate the learning process. Through these assignments that include intensive interaction and participation, students are seen to grasp concepts better and faster. The relationship between a student and a teacher strengthens through this teaching tool as the teacher includes the student in his/her teaching module. This allows the student to feel like he/she is a part of the class. As a result, their participation leads to better results. Interactive teaching tools like Tessesalator and Google classroom are extensively used by the faculty to assess the performance, conduct online quizzes and assignments. This gives the students access to websites to submit their assignments and answer the quizzes posted by the faculty. The online platform, Telescope allows students to do practice from home, have online classes, boot camps, discuss and debate topics of choice based on the uploaded content.

Guidance and financial assistance is provided to students for participation in International and National conferences. Workshops are organized by the institution to exhibit technical skills of students. Students are also encouraged to appear for international certification exams. The institution, in coordination with NGOs, organizes social awareness programmes to develop a sense of societal and civic responsibilities among the students.

Problem solving methodologies: KMIT has a special initiative called ARJUNA to develop the problem solving capabilities of its students. Arjuna is an online course through Telescope. Problems of three levels (simple, medium and hard) of a specific topic are explained and uploaded. Students will be given a weak time to solve these problems. After a weak time, submitted solutions are assessed and top students are rewarded with cash prizes.

Students are also encouraged to participate in Model Preparation, Case studies, mini projects, main projects and internships both in and outside the institution with the latest technologies.

2.3.4 Innovation and creativity in teaching-learning

Response:

Based on outcomes and analysis methods that help individual batches to ensure maximum productivity learning methods are developed and upgraded from time to time. In the beginning of every semester, course files are prepared. This is done by strictly adhering to the university timeline of internal assessments. Each topic is completed within the timeframe to allow the students enough time to grasp the concepts. Role plays are used to provide students with an individual exposure to attain better understanding. Quizzes are conducted at the end of each topic to analyze and confirm the understanding of every subject.

Teachers practice collaborative methods to invoke student participation in the classroom of which the

jigsaw method is one of the most popular methods. In this process, the students are divided in several groups. Each group learns about a different topic. Upon attaining complete understandings of the given topic, these groups are split and regrouped in such a manner that one person from every old group comes together. They now have the responsibility of explaining to the others their given topic. In this way, every student learns about every topic from each other. Projects are given on regular basis to test their understanding and help the students learn beyond the syllabus. Notes and videos of every class are posted on our automation system to provide easy accessibility of academic material to the students in case they need to refer and/or missed the class for various reasons.

Some of the best practices implemented with success in KMIT are

1. Extensive use of ICT

Majority of classrooms, Seminar halls, Auditorium and all labs of KMIT are equipped with LCD projectors, wifi connectivity.

2. Tessellator

KMIT makes use of Tessellator software, which was built in-house for improving the teaching learning experience. This software platform is used for continuous student monitoring and online performance evaluation.

After each programming class, students are required to take a quiz which is a collection of multiple choice questions and programming task pertaining to the class held. There are usually three programmes given to the students. If the student is a slow learner, he/ she might be able to work on a single programme. The fast learners may go to the 3rd programme.

3. Telescope

Online classes for KMIT students are held on web portal TELESCOPE. These classes are held early in the morning or late evening. Tessellator is integrated in TELESCOPE thus benefiting the students.

4. Integration of NPTEL lectures into TELESCOPE/TESELLATOR

NPTEL has state of art video lectures on many Science and Engineering subjects. These videos are downloaded and integrated into TESSELLATOR. The way of typical class on a course would run as follows.

After giving a brief introduction to a concept, Lecturer will play NPTEL video to the class. After the video is played lecturer summarises the topics

and answers any doubts students may have. Students take the quiz test in Tessellator. After giving reasonable time to students, the lecturer solves the program for the benefit of all the students.

2.5 Evaluation Process and Reforms

2.5.1 Reforms in Continuous Internal Evaluation(CIE) system at the institutional level

Response:

KMIT, affiliated to the Jawaharlal Nehru Technological University Hyderabad (JNTUH), adheres to the syllabus prescribed by the JNTUH, Hyderabad. KMIT follows JNTUH guidelines to carry out a continuous internal evaluation system at the institutional level.

As per the University norms internal exams will be conducted. Two internal examinations will be conducted during the semester. After the completion of half of the syllabus, first internal examination will be conducted as notified by the University. Internal exam paper consists of objective questions, filling in

the blanks and descriptive questions. Second internal exam will be conducted after the completion of the syllabus (at the end of the semester) covering the second half of the syllabus. Average of the two internal exam marks will be considered for grading.

The objective questions tested help the students increase their knowledge of the subject from basic level. The questions given are mapped with course outcomes and bloom taxonomy. In the process of continuous internal evaluation, the descriptive question paper is comprised of four questions, out of which two are to be answered. After the evaluation, Course Outcome attainment is calculated. Based on the attainment corrective actions are taken.

Internal examination will be conducted for laboratory subjects also. Evaluation is done both in theory and practical examinations. The assessment remains impartial and accurate. The students are given feedback about their performance and suggestions are given for their improvement.

In addition to regular internal examinations, slip tests/quiz will be conducted after the completion of each topic and unit test will be conducted after completion of each unit of the syllabus. After the completion of each unit, students are informed about the slip tests through a notice well in advance. Teachers discuss possible questions.

These tests allow the teachers to continuously assess the students to track their progress and to identify slow and advanced learners. Special classes will be arranged for identified slow learners and advanced learners will be encouraged to appear for certification examinations. Before the commencement of the University exams, preparatory exams are conducted to make the students confident in their approach. Students get a chance to improve themselves through this continuous evaluation system before appearing for the university examinations. Dates for conducting the main examinations are given by the university.

Tessellator, Unique software developed by KMIT, is used to evaluate day to day performance of the students. Faculty update student's performance by using Drona App. Students get regular updates about exams and evaluation through Netra App. As a part of curriculum KMIT encourages students to carry out both mini and major projects to work on the real world problems and to be familiar with industry environment. Project evaluation of the final year students is carried out in various stages by the project guide, head of the department and project coordinators. The factors considered for evaluation of project are synopsis, understanding of project topic, design or synthesis, mathematical modelling, presentation, experimental results and project report.

File Description	Document
Any additional information	View Document
Link for Additional Information	View Document

2.5.2 Mechanism of internal assessment is transparent and robust in terms of frequency and variety

Response:

Internal assessment is carried out to ensure the complete understanding of each topic by the students and so

they are conducted regularly to keep up with the syllabus prescribed by the university. The evaluation of these examinations is done by faculty members. While preparing the question papers, the teachers in charge give careful consideration of the syllabus prescribed and the portion covered in the classroom. The level of question papers is maintained which is neither too difficult for the students nor too easy. Different patterns and types of questions are used to prepare the students for any examination. The question papers are approved by respective heads of the department. They are then sent to the exam branch through mail by the respective faculty. The departments submit two sets of question papers for their respective subjects. One hour before the examination commences the Principal selects one set of question paper.

The selected set is then considered for the exam. This ensures no leakage of question paper in any form. The exams are conducted as per guidelines prescribed by the university. They are monitored by invigilators who maintain the code and conduct of an examination hall. All students are given a similar examination atmosphere and conditions.

Once the examinations are conducted, the answer scripts of students are evaluated by faculty members. Evaluation is done as per the guidelines and scheme of evaluation. The teachers maintain impartiality and fairness. They ensure that they mark each student equally and maintain a code of sincerity.

Once the papers have been evaluated, they are distributed back to the students by the teachers. The concerned faculty discuss the questions and the corresponding answers. This helps the student understand their mistakes and note down the correction. Thus the students are allowed to assess their own work and any modifications to the marks are reflected. Suggestions are given to the students who need to improve and the ones who performed well are appreciated. The feedback on their performance helps the student to perform better next time.

Finalized marks are verified by the teachers and students before displaying on the notice boards of respective departments. These mark sheets are also intimated to the parents via SANJAYA App and SMS. Regular parent teacher meetings are conducted and mark sheets are to the parents. This enables the parents to be updated about their ward's performance and encourage their process at the same time.

Therefore, the process of continuous internal assessment is carried out with complete transparency.

File Description	Document

Link for Additional Information	View Document

2.5.3 Mechanism to deal with examination related grievances is transparent, time-bound and efficient

Response:

The college conducts two types of examinations, internal and external. External examinations are conducted by the University and the internal examinations are conducted by the college. As part of internal examinations, slip tests/quiz, unit tests and mid examinations are conducted. The examinations are

conducted with utmost care leading to transparency and fairness.

External examination hall tickets are issued to the students well in advance. Any grievance related to the hall ticket like printing of wrong name or delay in issuance is addressed by the exam cell. The exam cell immediately looks into the matter and takes necessary actions. The issues of the students are dealt with high priority and solved as soon as possible.

The question papers for internal examinations are prepared by the respective teachers and approved by the head of the concerned department. College receives Objective question paper from the University. Two sets of descriptive question papers are prepared by the concerned faculty and the Principal picks one set on the day of the exam. This ensures fairness and removes the chance of usage of unfair methods. The external question papers, received from University through online mode, are printed 15 minutes before the commencement of examination. External examination papers are evaluated at the University.

No student is allowed to carry any material other than the hall ticket to the exam hall. In the event of a student is found using unfair means during examinations, Principal is notified about the incident. The Principal then communicates with University and acts based on the recommendations of the University.

Post internal examinations, students are given back their evaluated answer scripts. Students are permitted to assess their own performance and seek any clarifications to the teacher. In case they are entitled to more marks, teachers do the needful. Following the review of answer scripts, the marks are entered in a register before forwarding them to the university.

In the case of external examination, any grievance is addressed by the examination branch. The student in need of help explains his/her grievance to the person in-charge who reviews the complaint and provides a solution. In case the university needs to be contacted, a standard fee is collected. Upon receiving the fee, the college in-charge represents the issue to the university and pursues it till it is re solved.

University provides three options to students to resolve their grievance related to valuation of external examination answers scripts. Students can apply for recounting or re valuation. If the student is still not satisfied with the outcome of re valuation, he can apply for challenge re valuation.

All grievances are therefore solved with utmost care to student sensitivity. College level grievances are solved within two-three days. The college is dedicated to provide students with time-bound, transparent and efficient solutions for their examination related grievances.

2.5.4 The institution adheres to the academic calendar for the conduct of CIE

Response:

The institution ensures effective time management and timeliness. In the beginning of the academic year, academic calendar is published by the University for Respective Course. The college carries out effective planning to stick to the academic calendar. This allows the teachers and the students to space out their teaching and learning and regular assessment of the same.

KMIT strictly follows the academic calendar to conduct class work and internal evaluation and assessment of the students. The two internal examinations are conducted on the dates specified in the academic calendar. Internal assessment consists of three parts – descriptive, objective and assignment. The descriptive component is for maximum of 10 marks, objective component is for maximum of 10 marks. The assignment is for 5 marks.

Every academic year consists of two semesters. Each semester is to be of 16 -18 weeks. The first Continuous Internal Examination (CIE I) also known as Mid Examination I (Mid I)along with the Lab Internal examination-1 is conducted after 8 weeks of class work. CIE II (Mid II) and Lab Internal II are conducted after 16 weeks of class work. Within the above mentioned 8 weeks of class work, the concerned syllabus is taught to the students and exam will be conducted on the syllabus covered.

An average of both these examinations is calculated to attain the final internal marks of the student. These marks are also assessed to decide the course of nature for teaching slow students and rectify their performance before the external examination. All question papers are mapped with their respective course outcomes that are stated in the beginning of the course.

The assignments given to the students involve unaddressed program outcomes. This helps the students attain knowledge beyond the syllabus as these topics are not covered by the exams conducted by the university but are still relevant. These assignments are given within a set timeframe. The students are to complete them within the time given to adhere to the university's timeline.

Following the university calendar, every department creates internal calendar to ensure timely completion of syllabus. Every teacher follows a strict agenda that is discussed and approved by the head of their respective department. This is followed by deducing a day-to-day division of topics and chapters. These topics and chapters are chosen keeping the upcoming CIE in mind. The timeline created provide enough time for the faculty to complete the syllabus and for students to prepare and practice the concepts.

Both internal and external lab examinations are also conducted in accordance with the academic calendar. Internal lab examinations are conducted during the regular lab hours at the time of theory mid examinations. Thus KMIT strictly adheres to University academic calendar in all aspects. In case of any required change, the university communicates the modification in the academic calendar to the college and the college enforces the same. In any condition, the academic calendar is followed a

2.6 Student Performance and Learning Outcomes

2.6.1 Program outcomes, program specific outcomes and course outcomes for all programs offered by the Institution are stated and displayed on website and communicated to teachers and students

Response:

POs and COs for all programs prepared by associated subject experts are being communicated to the

stakeholders. Wide publicity is given for the same so that they will reach each stakeholder.

Program Outcomes (POs) and Program Educational Objectives (PEOs) have been displayed in the notice boards, laboratories, corridors, Staff Rooms, classrooms, common areas and College Web site. All POs, PSOs and PEOs of the department are printed on lab manuals

All the departments maintain a department file containing the list of Program Outcomes (POs) & Program Specific Outcomes (PSOs) of all courses offered by the program. Institute's central library keeps all the POs, PSOs and PEOs for easy access to students and faculty.

The Course Outcomes (COs) are clearly defined in the respective course files which are made available to the students through the departmental websites. Based on the interaction with the student community Course outcomes are suitably modified as per CO redefined procedure.

Faculty members highlight the concerned CO and PO related to their specific topic during the lecture hour in the classroom. While dealing with each topic, the faculty checks for the attainment of the CO. The same is evoked from the students. The Question papers of both internal and external assessments are prepared in such a way each question is clearly mentioned with the allied CO.

Faculty share their respective COs with the other faculty of the department. Ideas and suggestions are exchanged. Any modification, if necessary is made and changes are done accordingly.

The formulated COs are communicated to the stake holders through handouts. Awareness about outcome based education is created by distributing informative handouts to parents during Parent Teacher Meeting.

Alumni meets are conducted once in a year. During these meetings, outcome based education is discussed with the respected alumni and suggestions for improvements are encouraged.

2.6.2 Attainment of program outcomes, program specific outcomes and course outcomes are evaluated by the institution

Response:

The accomplishment of effective program outcomes, program specific outcomes and course outcomes becomes fundamental for the successful running of an educational institution of any sort. To ensure the same, the institution follows the system of evaluation.

The internal examinations i.e MID I and MID II are formulated keeping this in mind. The question papers are therefore mapped to the Course Outcomes and Blooms Taxonomy.

Each midterm examination is conducted for a total of 25 marks. These marks are distributed in a manner that each section tests the student understanding of the topic in depth. Accordingly, 10 marks are allotted for descriptive questions, 10 marks for objective questions and 5 marks for assignments.

The subsequent targets for the students in relation to these examinations are set by the corresponding faculty based on the evaluation of previous year's results.

The evaluation is rigorous. It is done by mapping the marks acquired by the students to their corresponding Course Outcomes. The marks of descriptive questions as well as objective questions are mapped.

Out of the total weightage, mid I and mid II performances are considered to account for 25%. The remaining 75% weightage is given to the end exam marks.

The college follows a process of teaching that urges the teachers to design, deliver and assess. Upon receiving the syllabus from the university, the teachers design the curriculum in a way best suited for the students. They then follow a variety of teaching methods to successfully deliver the said curriculum to the students in a way that they can understand the same. After delivering the syllabus, the teachers conduct examinations to assess the understanding. Based on their individual analysis of every student, they decide whether or not they need to modify their way of communicating with the said student. The ones who seem to require more attention than others are offered remedial classes to help with their academic performance.

This process of providing additional support to the ones in need comes under the program of plan, do, check and act (PDCA). Similar to design, deliver and assess program, the PDCA additionally helps those in need by providing the extra academic support from the teachers. This is done by assessing the average

marks obtained by the students in their mid terms.

Following the above mentioned steps, program specific and course outcomes are arrived at for each program. After strict adherences to the above procedures, the college can provide outcomes. These outcomes are then closely analyzed by subject experts to incorporate any changes that are required in their way of teaching to better the students' performance. Using this procedure, teaching plans are finalised and necessary changes/modifications are notified to the university. We at KMIT strive our best to ensure that our teachers and faculty deliver to the best of their capabilities to enable the students to receive the very best of their course and program outcomes.

3.2 Innovation Ecosystem

3.2.1 Institution has created an ecosystem for innovations including incubation centre and other

initiatives for creation and transfer of knowledge**Response:**

KMIT has the vision to produce highly skilled, globally competent engineers, who are ready to lead the global society and improve the quality of life. KMIT has established research and development cell and entrepreneur development cell to strengthen, and expand the research and entrepreneurial activities.

Research and Development (R&D) Cell:

KMIT encourages its faculty and students to be active participants in research and development. KMIT promotes research based projects/activities in the emerging areas of technology convergence. R&D cell deputed faculty to various industries, research organizations for getting collaborative projects and adopting best practices. The cell arranges guest lectures by industry representatives on their needs, as well as arranges the lectures by eminent academicians and research scholars. Faculty and students are encouraged to visit research-oriented labs and industries. Students are motivated to carry major projects based on latest technologies.

Thus, broadly R&D cell activities include:

Promote multidisciplinary research projects.

Promote the publication of research papers in reputed conferences and journals.

Foster R&D through industry collaboration.

Consultancy service to industries with their research related projects.

Conduct workshops, Seminars and development programs for faculty and staff.

Encourage faculty and students to apply for Patents and Intellectual Property Rights (IPR).

Entrepreneur Development Cell:

KMIT has a mission to encourage and enable students to not merely seek jobs from the industry but also to create new enterprises. KMIT acts as a platform for budding entrepreneurs and provide provisions to

explore their ideas. Institute also makes students aware of the process of developing engineering products and starting a business.

Thus, broadly Entrepreneur Development Cell activities include:

Train and motivate the students to become job creators rather than job seekers.

Inculcate the entrepreneurial culture in their minds.

Provide support to students in starting businesses of their own.

Train students in Product identification (PI), Market survey, Preparation of project reports and technical feasibility report.

Financial assistance.

3.4 Extension Activities**3.4.1 Extension activities in the neighbourhood community in terms of impact and sensitising students to social issues and holistic development during the last five years****Response:****COMPUTER BASICS FOR SENIOR CITIZENS**

KMIT has taken an initiative for training senior citizens on computer basics as it helps them in taking care of their day to day interactions and activities. Learning new skills at an older age is challenging, but at the same time it is empowering and boosts the confidence level of the seniors.

YOGA CLASSES

KMIT conducts yoga classes for the benefit of students and staff. As a part of Social initiative KMIT invites local people also to these classes. Aside from the physical benefits, yoga helps a person in managing stress.

ANTI RAGGING RALLY

On 7th Sep, 2015 Keshav Memorial Institute of Technology organized an “Awareness rally on Anti ragging” in the college premises. Students are participated with placards, pictures, banners appealing the society to have a strict orientation towards the ragging and to report ragging at their Face book page-“Anti-ragging cell-Hyderabad”. More than 150 students participated in the rally. Students taken up slogan as “LET SAY NO TO RAGGING”

AIRTEL HYDERABAD MARATHON---2015-2018

The Airtel Hyderabad Marathon’s 5th edition was held on 30th of August 2015 and KMIT has supported the event by sending about 150 volunteers to the marathon. The full marathon ran 42km and half marathon is of 10km. It was a successful event to both, the managing team and the runners.

Since 2015 every year KMIT is supporting the event by sending about volunteers to the marathon.

A DEED WELL DONE – CHARITY ’17

Charity organisations - an orphanage, an old age home and an animal welfare organisation, along with an organ donation pledge campaign, powered by JeevanDan, NIMS.

This initiative: from setting camp in the scorching heat for collection of donated clothes and items to spending time at the orphanage and old-age home, they were dedicated to the cause and proved worthy of the trust placed in them.

<http://kmit.in/emagazine/article/deed-well-done-charity-17/>

A WALL OF MEMORIES- SAKSHAM 2K18

The *Petroleum Conservation Research Association (PCRA)* under the Ministry of Petroleum & Natural Gas, Govt. of India conducts an awareness campaign every year known as *SAKSHAM(Samkrakshan Kshmata Mahotsav)*. As a part of this month-long event, art forms such as painting, sketching, wall painting, etc. are conducted in educational institutions. It was conducted in February in KMIT.

<http://kmit.in/emagazine/article/wall-memories-saksham-2k18/>

Street Cause---*A Life without a Cause, is a Life without an Effect"*

Street Cause is an NGO comprising of students intent on doing their bit for the betterment of society. KMIT along with this NGO collected material and money and distributed to needy.

NAAC

Criterion 4 - Infrastructure and Learning Resources

4.1 Physical Facilities

4.1.1 The institution has adequate facilities for teaching- learning. viz., classrooms, laboratories, computing equipment, etc.

Response:

KMIT interacts with all stakeholders - faculty, alumni, students, parents and industry representatives to know the changing trends and requirements of industry and to facilitate good employability for students. Accordingly creation and enhancement of infrastructure facilities are planned. KMIT has well equipped and impressive infrastructure over 5 acres of land, 14020 square meters of built-up area, serene green land which provides an eco-friendly environment, and laboratories to conduct experiments and simulations. The available infrastructure is always more than required as per Norms of AICTE and JNTUH, the Affiliating University.

The facilities available are mentioned below:

KMIT has a separate building for I Yr. students. A separate building accommodates the Training and Placement cell.

Class Rooms:

KMIT has well-furnished, spacious classrooms with good ventilation to conduct classes. Classrooms are maintained as per norms for proper visibility of black board/white board and audibility. The classrooms are equipped with fans, lights, and LAN/WIFI connectivity. Most of the classrooms have projectors. All the class rooms of individual departments are at close proximity in order to have better access for the students.

Laboratories:

The Institution has laboratories as per the regulations of AICTE and JNTUH. The Institution has fully equipped laboratories, with well-maintained instruments, devices, and equipment to conduct experiments. Additional equipment is available to provide students opportunities to work on their projects. All the departments are fully equipped with the necessary infrastructure to meet the ever increasing requirements.

Seminar Halls:

The college has three seminar halls to conduct seminars, conferences, guest lectures, and workshops for students and faculty. All seminar halls have different seating capacity, and these are equipped with LCD Projectors, white boards, stage, podium, and public addressing system with internet facility.

Auditorium:

KMIT has an auditorium with 1000 seating capacity. Auditorium is equipped with LCD Projector and public addressing system. Wifi facility is available in the auditorium.

Computing Equipment:

The institution has 660 computers with good configuration. 20 computers and 12 laptops are used for administrative and academic purpose. The institute continuously keeps upgrading the internet bandwidth. Two leased lines of 350 Mbps each support the internet requirements of the college.

Library:

The institution has a central library, which is well equipped and furnished with sufficient seating capacity. Through the digital library, students are able to access to National Digital Library (NDL), SWAYAM, and NPTEL lecture videos. Library works for extended hours with internet facility and digital library.

Library Advisory Committee consisting of Heads of the Department of all branches recommends books and magazines to be subscribed.

4.1.2 The institution has adequate facilities for sports, games (indoor, outdoor), gymnasium, yoga centre etc., and cultural activities

Response:

Along with the academic activities, quality physical education programs are needed to increase the physical competence, health-related fitness, self-responsibility, and enjoyment. KMIT encourages staff and students to be active in sports and extra-curricular activities. This ensures a holistic development and an all-rounded personality. Students are trained in sports under the guidance of qualified and specialized coaches. Every week, one hour is allotted for the sports in the time table thus enabling the students to pursue sports. The students utilize these hours constructively to develop their physical skills as well as explore their interests and passion. Regular training is provided to those students who show extraordinary skills in different sports. Students are trained and encouraged to participate in various levels of competition including intra college events, inter-university events, national events and international events. Intra-college events are also organized by the KMIT to encourage students to participate.

The institution provides indoor game facilities for Table Tennis, Shuttle Badminton, Caroms and Chess. The institution has adequate playground for outdoor games like Volley ball, Basket ball and Foot ball. Students won medals and awards in national/international tournament.

The following Indoor and Outdoor facilities are available.

1.4 Badminton courts (One indoor and 3 outdoor)

2.1 Basket Ball court

3.2 Table Tennis Tables

5.10 chess Boards

6.6 Caroms Boards

7. Rest rooms for Players

8. A mini Football Ground

9. A Volleyball Court

YOGA CLASS

An exclusive facility is provided with a dedicated yoga teacher for training both the students and faculty. Practicing yoga helps a deep lasting personal transformation. Every year on June 21st, the International Day of Yoga is conducted where all the students and faculty proactively participate.

CULTURAL ACTIVITIES

The college believes in all-round development of its students. It constantly encourages them to take part in extra-curricular activities to spark their interests and cultivate leadership qualities as well as team spirit. Students clubs like Literary club, Music club, Creative arts club, Photography & short film shooting club are established. Students actively practice and participate in extra-curricular activities, participate in National level competitions and won awards and prizes.

As a part of cultural activities every year KMIT organizes Kite festival, KMIT Evening- cultural day of KMIT, Batukamma and Dandiya during Navaratri days and celebrates many festivals.

The inherent talents of the students are shared in kMITRA, an emagazine maintained by the students of KMIT. It's a platform for both students and faculty to exhibit their artistic and literary talents. kMITRA covers arts, book review, fashion, food, humour, movies, music, poetry and many more.

4.2 Library as a Learning Resource

4.2.1 Library is automated using Integrated Library Management System (ILMS)

Response:

The well maintained college library is enriched with a huge collection of valuable books. The library services are fully automated using an open source fully featured, scalable library management system, KOHA. All the transactions are fully computerized and all the documents are bar coded. The bar code ID and scanner are used for charging/discharging the books.

Library has computers available for use, with internet access and word processing software. Printing, Photo copying and scanning facilities are available. The Library is open for extensive hours, including evenings and Saturday and Sunday during semester End exams.

The institute has a digital library with 20 terminals.

4.2.2 Collection of rare books, manuscripts, special reports or any other knowledge resources for library enrichment

Response:

KMIT has the practice of collecting and maintaining rare books, manuscripts, special reports or any other knowledge resources to benefit students and faculty for their knowledge enhancement, research and exploring new things apart from the standard books. Library has collections in specific academic disciplines of Computer Science, Electronics and other interrelated disciplines. Apart from regular academic books it procures books related to entrances like Information Technology, Competitions, GATE, GRE, Fiction, Non-Fiction, Aptitude, Communications etc.

4.3 IT Infrastructure

4.3.1 Institution frequently updates its IT facilities including Wi-Fi

Response:

KMIT always aims at providing the futuristic facilities to all its stake holders so that they can utilize these resources to reach greater heights. To enable this, the institution frequently updates its IT facilities to provide the best of facilities. Classrooms have been equipped with LCD projectors and most of them are supported by audio visual systems and internet facility. The entire campus is monitored by CCTV facility. The CCTV installed at strategic places help monitor all the activities in the college. A unique learning management system called as TESSALLETOR is being used for teaching as well as assessing the students. Its a continuous student monitoring and online performance evaluation tool. It enables instant evaluation after the completion of each and every instruction session.

Many other exclusive apps like Sanjaya, Netra, Drona, and Dhanush are developed to serve the stake holders of KMIT. Sanjaya is an Attendance, Presence and Performance Monitoring System for Parents. Parents are able to watch their wards live in the classroom on their phones. Netra is an Android application for students of KMIT. In Netra students can view their performance, results, notifications about various events and soon. The marks attained by each student after every examination are updated on the automated system. This allows the students to review the marks being forwarded to the university and report any mistakes that might have been made. Information about upcoming events is available. Drona is an Android application for Faculty Members of KMIT. Faculty can mark the attendance, enter the topics covered etc. Dhanush is an attendance App used in SONET(School of New and Emerging Technologies), Finishing School and Trishul Classes.

The institute facilitates services like the advanced network facilities, powerful central servers, web-based email application, Internet security system, anti-virus software, Network services supporting up to the Distribution switch level, CISO access points, and Wi-Fi services.

There are in total 660 computers in various labs that are accessible to the students as well as the teachers for academic and co curricular purposes. There are two Xeon servers with 1TB hard disc and 64 GB RAM. Printers are arranged in the office, staffrooms, library, exam branch and laboratories. Wi-Fi is available at various labs and staff rooms. Students are given limited accessibility to this facility. The borrowing of books in the library is digitized.

Information about upcoming events is available on the web. This information includes the time and date along with details about the event. Following the completion of the event, pictures and minutes of the event are also uploaded for easy access. This allows the parents to be aware of the programs being conducted in college as well. For easier communication, circulars including important notices to students and parents are also posted online.

The academic calendar as well as the course information is also updated in the beginning of every academic year. The technology at college is constantly updated.

4.4.2 There are established systems and procedures for maintaining and utilizing physical, academic and support facilities - laboratory, library, sports complex, computers, classrooms etc.

Response:

KMIT has the structured system for maintaining the support systems of the institute to allow uninterrupted access to facilities for teaching and learning.

Laboratories: Maintenance

Preventive maintenance of laboratory equipments, electrical & plumbing facilities, etc. is carried out to avoid premature failure of a facility or equipment, item, etc. It is ensured that all the laboratory equipments are functioning as per the standards before commencement of each semester.

In case the facility or lab equipment is damaged or not working properly, action will be initiated to resolve the problem. If the situation demands, breakdown maintenance work is outsourced. Equipments which are beyond repair or have lost functional significance are write-off according to the policy.

Calibration of instruments is carried out as per standards and guidelines provided on it. Experimental setups and equipments are tested by faculty and lab assistant periodically.

Computers: Maintenance

Computer maintenance, Electrical repairs and other maintenance work are carried out in-house by lab assistants and in case if it is required, then maintenance work is outsourced.

General Maintenance of Infrastructure:

Repair and maintenance of the central facilities like DG set, transformer, RO plant, heavy duty digital

copier, bore well pumps, CCTV and water coolers, etc are carried out periodically. Gardens and lawns are maintained by the Gardener

Laboratory: Utilization

- With respect to the time table, the students conduct experiment in their assigned labs under the supervision of the lab-in-charges and lab technicians.
- Consumable and non consumable materials registers are updated periodically.
- Fire Safety equipment is maintained in labs as precautionary measure.

Before the commencement of the academic year, a lab audit is conducted and a report on the requirement of new equipment, replacement of the old equipment and modernization of machines/software is prepared along with requirement of consumables, non-consumables.

Classroom: Utilization & Maintenance

- Before the commencement of the academic year, depending on the intake of students, head of departments propound the requirement of classrooms to the Principal.
- Classroom allocation is done by the Principal and the HoDs in a meeting. Benches and windows are cleaned and mopping of the class rooms is done every day.
- In case of any damage to the projector, internet or the audio systems, the class mentor brings it to the notice of the HOD by registering the problem in the breakdown register. The necessary follow up is done by the department and steps are taken to fix whatever is broken.

Sports: Utilization

- Students are permitted to play only during the sports hours and to practice for any competition.
- Students are permitted to take sports material with prior notice to the Physical Director. Students must enter the details of material in the register.
- Concerned authority makes a note on return of the same in the register.
- In case of any damage observed, the same is recorded in the register pending further action. First aid box is always available for the students in case of any emergency.

5.3.2 Presence of an active Student Council & representation of students on academic & administrative bodies/committees of the institution

Response:

To inculcate leadership skills, organizing skills and to also play an active part in the day to day academic and co-curricular activities of the institution, KMIT encourages its students to be part of various academic and administrative committees. KMIT provides opportunity to the student community to express their opinion about the institution and recommends the suggestions as per their expectations. Institute ensures

participation of maximum students in all curricular and extracurricular activities organized.

The institutional committees have student representative that ensures participation of students in all activities. This helps in maintaining transparency in the overall working of the institution.

kMITRA: An emagazine of KMIT is run by the students.

KMIT Evening, Kite Festival: Students organize all technical and cultural events of KMIT.

Anti-Ragging Committee: The student members of the anti ragging committee help the new students to improve their confidence through counseling.

Academic Monitoring Committee: It consists of class representatives of all branches along-with faculty members to monitor and ensure discipline in academics. Alumni are invited to give their valuable suggestions that are incorporated for supporting the curriculum.

Library Committee: The student members put up their demands about learning material and express the problems faced by students, if any and utilization of library resources.

Internal Complaints Committee: To provide moral support to the students to raise their grievance, if any. This brings transparency in the process.

Sports Committee: The student members of the Sports Committee organize ensure maximum participation in both indoor and outdoor games.

Alumni Committee: The student members of the Alumni Committee organize Alumni meet every year and helps to interact regular students with the institute alumina by means of inspirational speech, guest lectures, gifts, etc.

5.4 Alumni Engagement

5.4.1 The Alumni Association/Chapters (registered and functional) contributes significantly to the development of the institution through financial and non financial means during the last five years

Response:

The Alumni association of KMIT, popularly known as KMIT PARISHAD is a platform for passed out students to have live contact with KMIT and interact with students. The members of the Alumni association meet every year and discuss on matters related to alumni and the development of the college. They also share their current experiences and recall charming old memories. The institute regularly invites the alumni to conduct expert lectures, seminars and workshops. The institute also invites the alumni for placement talks, entrepreneurship activities and financial contribution for the development of the students. The members of the alumni association regularly visit the college and Training and Placement Cell to conduct pre-placement talks, highlighting the job opportunities available in their respective industries.

Alumni contribution includes:

Establish Memorandum of Understanding between the institution and alumni entrepreneurs.

Suggestions and Support to Training and Placement Cell.

Enhance teaching learning process through Expert/Guest Lectures.

Interact with ongoing batch students in the areas of career awareness and career planning.

Participate in IQAC Cell for improving the quality of education.

Provide guidance to students for project work and on latest technologies.

Criterion 6 - Governance, Leadership and Management

6.1 Institutional Vision and Leadership

6.1.1 The governance of the institution is reflective of an effective leadership in tune with the vision and mission of the institution

Response:

KMIT with its effective governance is dedicated in setting up processes to achieve the vision, mission and goals of the institution.

The decision making process, the academic and administrative planning incessantly work towards achieving the vision of the institute. The vision of the institute was framed taking into consideration the need, the purpose and the desired outcome. Though the vision is set high it is not unachievable, persistent effort in the right direction and apt governance with effective leadership makes it attainable.

The vision is the source of inspiration to the faculty, management, staff and students. The vision proves to be the guiding principle for all the endeavours. It constantly reminds the purpose of existence, the need for strategic planning. Keeping this in mind every year, the gap analysis is done.

The analysis, to a large extent depends on the SWOT analysis. This leads to the understanding of various shortcomings, the pockets which need up-gradation, reinvention, recreation can be identified. The identification is the first step towards effective leadership, after identifying, a high level meeting is conducted at various hierarchical levels, all the various parameters are assessed and steps are taken to reduce the gaps in the vision and the mission of all the departments.

Suitable policies are framed, the teachers are trained to be more effective, are encouraged to take up higher education, to work in various industry related projects, attend seminars and workshops, present papers. The self appraisal and student feedback enable the teachers to upgrade themselves. Teaching-learning is the basic module of the college, but then the students are encouraged to excel in the academic curriculum and also develop their personality,

The JNTU curriculum and the academic calendar are followed to the dot. Apart from it leadership skills are also developed into the students. Employability skills, life skills, co-curricular, extra-curricular activities are also intertwined to create good citizens.

The effective leadership is not limited to the student and teaching faculty, the vision is achieved only when the entire framework works towards it, So the non teaching staff, supporting staff are trained to support the governing body. They are trained in office management skills, are computer and internet literate. They are rewarded and retained.

The various departments work keeping in mind their mission, understanding that they have to attain the vision of the college. The leadership is able to make the entire institute work as single large unit to achieve the excellence and vision of the college at the outset. In the inset the teaching, nonteaching, supporting staff, the various HODs co-operate and co-ordinate at various levels and inter disciplinary levels under effective Leadership and upright governance to achieve the vision of the institute.

6.1.2 The institution practices decentralization and participative management

Response:

Participative Management is one of the core features of KMIT. Management representatives, Principal, Faculty members and students play important role in participative management. Management representatives involves in maintaining quality and welfare aspects of the Institute. Principal drives all the academic and non-academic activities involving HODs and faculty. The institution reassures participative management at various levels. Administrative and academic committees are formed where students and faculty play a vital role.

Principal has full authority on academic activities and formation of various committees. HODs have functional autonomy to decide on the various departmental events and implementing them with the involvement of the faculty members. They have privilege in proposing the budget, framing timetable, subject allocation, assigning coordinators for various committees, conducting National and International Conferences, organizing seminars and workshops etc.

Annual budget: Proposal, Approval and Allocation.

The accounts department is in-charge of maintaining the budget. They manage the income and expenditure of all departments of the college to ensure clarity. There are various budgetary requirements at the institutional level. These include placement and training centre, examination branch, operation, research and development, teaching-learning process, applied learning and administrative processes.

All departments' heads are invited to submit their carefully processed budget proposal for every academic year with a monthly break up to the accounts department. This budget proposal is formulated after lengthy discussions at department meetings organized by the HOD. Departments arrive on conclusive summary after discussing the essential requirements to fulfill the needs of the department including the budget required for faculty/student development activities like guest lectures, seminars, workshops and conferences.

Along with this, lab-in charges are also asked to come up with a proposal of their requirements including purchase of new equipment, repairs and maintenances, service, training and up gradation.

All proposals from various persons in charge, faculty and students are discussed in department meetings, reviewed and forwarded to the reporting authority for further processing.

Principal consolidate all the budget proposals received from the subordinates and organize a meeting to eliminate redundancy. If the same proposal is sent by multiple departments, a discussion is carried out to decide which department receives the budget.

Modified proposed budget of all departments is forwarded for the Chairman's approval. The Chairman then calls the leadership team for a meeting to further refine the proposed budget. A final proposed budget including all anticipated income and expenditure prepared by the accounts department is presented to the governing body for approval. As the document is an outcome of an integrated approach of participative process, it is approved by the governing body. Any objections or concerns by the members are discussed, recorded and decisions with majority of acceptance are made for making changes in the proposals.

Approvals of budgets are communicated to all departments through proper channel.

Accounts department releases funds on monthly basis, as planned. Through effective decentralization, the institution practices successful delegation and enhances the productivity of the college. Through participative management, each person in-charge handles their allotted activity and ensures its complete and constructive delivery.

6.2 Strategy Development and Deployment

6.2.1 Perspective/Strategic plan and Deployment documents are available in the institution

Response:

A strategy describes how the ends (goals) will be achieved by the means (resources). The senior leadership of an organization is generally assigned the task of determining strategy. Strategy can be planned (intended) or can be observed as a pattern of activity (emergent) as the organization adapts to its environment or competes. The development of the institution is an ongoing process. At every step, the management strives to improve the institution. This is made possible with the help of perspective/strategic plans that chalk out the necessary actions to be taken to grow and develop.

The first step towards any real progress is brainstorming ideas. All stake holders of the institution are involved in the process. Their inputs and suggestions are considered while developing the strategic plan. The tasks are divided based on their merit and the facilities to fulfil them into three major categories. These are formulated as lists under short term plans and long term plans.

Once the plans are approved by higher authority, every department is instructed to work on their strategic

plan to achieve their goal. One such example of fine implementation of a strategic plan was the goal for 100% placements with 10% improvement each year. Firstly, the primary and secondary goals were decided and strategic decisions were made. Then the process of achieving this task was discussed and formulated. It contained an overview of exactly how the task was to be completed.

Once the process was outlined, it was broken down to separate tasks. Every step of the process contained certain tasks, which were divided to get a clear picture of what needed to be done down to every detail.

A SWOT analysis was then conducted on the department in-charge of the concerned task. Their strengths, weaknesses, opportunities and threats were listed to prepare for the upcoming activity. Through the SWOT analysis, the team was able to utilise the strengths of their group, understand their weaknesses, grab the opportunities and overcome the threats. This helped the time taken to complete the task significantly and therefore SWOT analysis is one of the most important steps of strategic planning.

Once the weaknesses and threats were identified, steps were taken to overcome these challenges. A start date and an end dates were assigned to the solution along with a person in-charge who was to solve this particular challenge within the given time frame.

A similar process was followed to complete the action plan of the task break up as well. Individuals were made responsible for each task and were assigned respective start and end dates. They were expected to complete given task within the given period.

Through such a division of work, every individual was responsible for their specific task roles. This enabled them to focus solely on their assigned roles resulting in excellent outcomes. It also helped the group work as a team and overcome obstacles leading to achievement of their goals.

6.2.2 Organizational structure of the institution including governing body, administrative setup, and functions of various bodies, service rules, procedures, recruitment, promotional policies as well as grievance redressal mechanism

Response:

The governing body of KMIT is constituted as per the AICTE norms. The body meets once in a year in general and few more times on the basis of any ad-hoc need. Decisions like introduction of new course, closure of existing courses, construction of new blocks, enhancement of physical facilities and other initiatives for improvement of the institution are taken in the form of society resolutions in the governing body. Governing body is the ultimate authority for any decision in the institution.

Administrative set up of the institution is as per the organization chart of the organization. Governing body being the ultimate authority will have the Chairman of the society under the body.

- Board members are under Chairman.
- Principal is the academic and administrative head of the institution.
- Heads of the Department report to the Principal.
- Staff report to respective Heads of the Department/ Coordinators.
- Heads of Administration, Examination branch, Library and Physical Education report to the Principal

Coordinators are under Heads of the department.

In addition, the organization has several committees headed by the senior faculty report to the Principal.

Service rules have been formulated as per the guidelines of competent authorities like affiliating university (JNTUH) and approval body (AICTE) and institutional values. To maintain the harmony and satisfaction levels of all the stakeholders the institution has an effective online Grievance Redressal Mechanism.

All grievances of the staff are to be redressed quickly, as each staff is a vital member of the organization. Any complaint reported verbally or written should be appropriately dealt with by the concerned Head of the Department. However, the staff, if desired or not feel that his grievance is not redressed to satisfactorily, can approach the Grievance redress cell.

6.2.4 Effectiveness of various bodies/cells/committees is evident through minutes of meetings and implementation of their resolutions**Response:**

To assist the college administration a number of committees / cells are formed to attend and resolve the grievances /complaints of students and staff amicably. Every student and staff in the college will have the opportunity to bring to the notice of their problems to the administration. Complaint boxes are placed at various places in the campus and also a portal in the college website is available for the students to lodge complaints through online. The committee will look after grievances / complaints of various nature such as Parents meetings and correspondence with parents regarding attendance and performance of their wards.

Ragging is a multidimensional problem and a widespread phenomenon in our higher education system, impacting students and the academic environment in the institutions of learning. KMIT is grateful to the parents, staff and students for their help in this challenging endeavor to stop ragging. To prevent this ragging, an anti-ragging committee is constituted with members from faculty and students. Institute has an Anti-Ragging squad in the college campus specially in the I Yr Block, canteen and play ground. A standing disciplinary committee to address complaints based on the report of the enquiry committee constituted as and when required. Anti-ragging committee meets periodically in the campus to prevent ragging. Society has placed 118 surveillance cameras in different places of the campus which are regularly monitored.

Following are the some of the committees/cells that are being functioning effectively to address various issues for smooth running of the institute.

Finance Committee	Anti-Ragging Committee
Women's Development Cell	Canteen Committee
Library Committee	Time Table Committee
SC/ST Cell	Grievance Redressal Committee

Internal Complaint Committee	OBC Cell
Examination Committee,	R & D Cell,
EDC,	IQAC,

6.3 Faculty Empowerment Strategies

6.3.1 The institution has effective welfare measures for teaching and non-teaching staff

Response:

Keshav Memorial Institute of Technology recognizes the contribution of the employees towards the development and progress of the institution. The College offers/provides lucrative welfare schemes to all the employees to ensure and increase their work efficiency. The following are some of the amenities/service facilities provided to the Teaching and Non Teaching staff.

1) PROVIDENT FUND:

EPF scheme is available in the Institution as per rules and regulations since the inception.

2) ESI FACILITY:

ESI facility is provided by the College to the employees of KMIT

3) GRATUITY:

As the Gratuity Act, 1972, KMIT pays Gratuity to its employees. Employees are eligible to receive gratuity as per the eligibility norms.

4) PAID LEAVE:

Under this scheme, the College sanctions paid leave in case of employee's marriage, maternity, bereavement in the employee's family, or health related issues etc. **Six months maternity leaves are applicable to eligible staff.**

5) LOAN FACILITY:

All the employees of the College are provided loan facility related to a) purchase of laptop b) personal loan facility etc.,

Besides the above mentioned schemes there are other welfare schemes such as festival cash advances, travel and accommodation allowances for knowledge enhancement etc.

6) INCREMENTS AND INCENTIVES

Increments and incentives for better results in examinations in concerned subjects are given to the staff members every year.

7) LEAVES

The faculty members are eligible for availing casual/ sick leave of 15 days per year. Vacation leaves for teaching staff is 30 days and 15 days for non teaching staff.

8) FACULTY DEVELOPMENT PROGRAMMES

Training and Faculty development programmes are organized for the professional development of the faculty. 50% of the fee is reimbursed by the college as per the eligibility norms.

9) PAPER PUBLISHING, CONFERENCES

Both financial and technical support will be given to faculty to attend conferences, workshops, presenting papers in conferences, seminars etc. organized by other institutions. Also provide financial assistance for Journal publications

10) PLEASURE TRIPS

Institute organizes a pleasure trip for the faculty once in a year.

11) CERTIFICATION PROGRAMME

KMIT encourages faculty and technical staff to get internationally renowned certifications. Exam fee is reimbursed on submission of the certificate. Institution provides membership fees to the faculty advisor of student chapter.

12) OTHER FACILITIES:

- i) Provision of an excellent canteen in the campus.
- ii) First Aid medical unit is available for the staff and students.
- iii) RO drinking water in various locations along with water dispensers.
- iv) Sports facility for all Teaching and Non-Teaching Staff.
- v) Reward for producing University Ranks

6.3.5 Institution has Performance Appraisal System for teaching and non-teaching staff

Response:

KMIT management conducts performance appraisal of all members of the faculty relative to quality of guidance, instruction, curriculum delivery, University exam results and student feedback. The goal of the college in assessing its faculty is to identify and correct inefficiencies and provide the necessary direction and guidance in support of each individual faculty member for assurance of quality and integrity. Faculty members are assessed in the areas of faculty standards, program operations, and the college's policies on ethics and professional behaviour. Assessment of program operations should focus upon orientation of the student, planning of student degree activities, course planning and delivery, and proper conduct of the program, reporting of student progress, and maintenance of quality standards.

Some of the important parameters are explained below

1. Self Assessment: The Self Assessment process allows faculty members to reflect upon their effectiveness in accomplishing their current job requirements and the responsibilities of their position with the college. Faculty are asked to assess their performance and growth in each self assessment category, identifying areas where they are successful and areas where they are in need of improvement

2. Subject knowledge: Interpersonal Relationships: Willingness and demonstrated ability to cooperate, work, and communicate with coworkers, management, and outside contacts and to make an unselfish contribution to improving the morale of the faculty, staff, and administration.

3. Verbal and Written Communication: Effectiveness of expression in individual and group situations including listening, verbal and affective communication, and appropriate language and ability to express ideas clearly and concisely in good grammatical form and to successfully address the issues in the tasks at hand

4.Coordination: Ability to work with others as a team and express individual viewpoints and requirements from the perspective of the faculty position while considering and learning from the input of others.

5.Planning and Organization: Ability to establish appropriate course of action for self and faculty to accomplish goals Ability to make appropriate use of resources and the time of faculty and set realistic target dates for the completion of important tasks.

6. Adherence to Policies and Procedures: Ability to properly interpret and apply University policies and procedures and desired manner of operations to the responsibilities and tasks of the job.

7. Orientation towards Results: Ability to initiate projects, anticipate changes or needs, establish new priorities, follow through and meet deadlines.

Process explaining Appraisal system:

The self appraisal forms are filled by faculty and submitted to HOD, these forms are reviewed by the HOD and are forwarded to Principal after making some comments. The Principal then in consultation with the management announces the appraisals.

6.4 Financial Management and Resource Mobilization

6.4.1 Institution conducts internal and external financial audits regularly

Response:

The prime objective of institutional financial audit is to review the income and expenditures.

Audit involves performing procedures for accountability in financial transactions.

The institution prepares its budget every year as per the recurring and non-recurring expenses requirements of all departments as well as functional committees and is submitted to the management for approval. The

sanctioned budget from the management is then allocated to the departments under the categories such as consumables, lab equipment purchase, industrial visits, research and development activities etc. A pre-defined institutional procedure is followed by all the departments for various purchases and expenses.

To ensure proper utilization of funds and to minimize any discrepancy, the Institution conducts internal as well as external audit at regular intervals.

Internal Audit mechanism is ongoing continuous process to check and verify all vouchers of transactions with reference to sanctioned budget. All recurring and non-recurring expenses are reflected in the internal audit report. Necessary comparative statements, Purchase Orders, Tax Invoice / Bills are verified. Auditor prepares its internal audit report mentioning the discrepancy observed during the audit (if any). The report, along with audit observations, is submitted by auditor for further explanation and corrective actions.

External auditor conducts audit to determine the quality of financial operations performed during the financial year. As a part of an audit, the auditor reviews financial transactions and expenditure record.

Internal and external audit ensures accountability and minimizes the discrepancies. Minor errors of the financial transactions when pointed out by audit team are immediately corrected / rectified and precautionary steps are taken to avoid recurrence of such errors in future.

6.4.3 Institutional strategies for mobilisation of funds and the optimal utilisation of resources

Response:

Being a self-financing institution, affiliated to JNTUH, major portion of the income comes through tuition fee, as fixed by TAFRC, Government of Telangana from time to time. The list of fines are library fine for non return books, laboratory fine for breakage of laboratory apparatus.

The expenditure mainly consists of salary payments, Laboratory infrastructure and maintaining building infrastructure, purchasing of Library books, racks and furniture and so on.

Utilization of resources plays very important role in institute. Fund utilization include free ship programs conducted for students to improve technical skills through Finishing School and School of New and Emerging Technologies (SONET), career development programs, R&D activities and placement related activities,.

The following procedure is adopted for the utilization of resources.

Planning: The Head of the department calls a departmental meeting to finalize an annual budget. The laboratory in-charges propose laboratory-wise requirements along with supporting documents as received from the subject teachers. The expenses required for the departmental activities such as organizing co curricular and extracurricular activities are also included in the annual budget.

Budget Formulation: An annual budget of the department is prepared and forwarded by all the HODs to the Principal for consent. After the review, Principal directs the administrative officer to prepare a consolidated budget of the institution. The final consolidated budget is forwarded to the Management Committee for a final approval.

Allocation: With the approval from the Head of the Institution fund will be released as per the necessity of the proposed expenses. Provision is also made for emergency expenditure.

Expenses: The sanctioned funds are utilized for the development of laboratories, procurement of books, national /international journals, staff salary, development and maintenance activities, etc. In case of any additional funds required for unplanned activities such as attending seminars / workshops / conferences / technical competitions, then the concerned faculty has to prepare a note stating the details of the

importance with supporting documents. Thereafter, the note is forwarded to the Principal through HOD for consideration and consent. Looking to the importance of the requirement, the Principal forwards the note to the Management for its final sanction. Once the sanctioned is received from the Management, the Principal directs the HOD for utilization of requested sanctioned funds.

Audit: The Accounts Section of the Administrative office verifies the expenses against the sanctioned amount carried out under various institutional / departmental activities from the supporting documents and gives their remarks for the final settlement. Internal and external audits are carried out twice and once in every financial year respectively by the Chartered Accountant to ensure proper utilization of the funds as per the allocation by management committee.

6.5 Internal Quality Assurance System

6.5.1 Internal Quality Assurance Cell (IQAC) has contributed significantly for institutionalizing the quality assurance strategies and processes

Response:

Keshav Memorial Institute of Technology is committed to continually improve the infrastructure, enhance the faculty competencies and empower the students to self-learning. The Internal Quality Assurance Cell(IQAC) The Internal Quality Assurance Cell(IQAC) was established at KMIT in June 2013 with the approval of the governing body and its first meeting was conducted in the same month. The IQAC enables the institution to focus on this mission and never falter from their goal.

IQAC not only acts as a quality sustenance measure but also monitors the quality of services being provided by the institution to its stakeholders. The IQAC has made a prominent and meaningful contribution through channelizing the efforts and measures of the institution towards academic excellence. Parameters related to the enhancing of the quality of the institution like Infrastructure, workshops, conferences, FDP's, paper publications, innovations in teaching and more are considered after the approval of IQAC Committee.

Example 1: Training programs to the faculty and students

The institution pays lot of attention to the quality of its product. Through years of progress it has initiated and developed several activities and training programs for the faculty through IQAC. Some of the notable activities organized by IQAC for the development of the institution are establishment of full-fledged Training and Placement cell-Bhavishya Dwaar, Finishing School, Customized Workforce Development (CnD), School of New and Emerging Technologies (SONET), Pre FS Program, organizing seminars, workshops, and many more.

The institution has organized International Conference on Fog Computing and Internet of Things 2017 (ICFCIOT 2017) which was conducted by Computer Engineering Department on 21st -22nd December 2017. Total number of 64 faculties and 130 students participated in conference and 25 papers were presented and published.

Example 2: Finishing School Program (FS)

Drawing from the rich experience of promoters in software training education, invaluable inputs from numerous leading industry experts, the institute has designed an exhaustive and innovative program which is called the KMIT Finishing School Program(FS). Built to help the students secure their future and enable them to create their own path, this program allows every student of KMIT to be successful. If followed diligently, the program completely prepares the students to venture out and begin their careers – be it a job, higher studies in India or abroad. This systematic, rigorous, outcome based program uses the concept of digestible lesson plans as building blocks and measurable outcomes to slowly but surely train students for success in their chosen careers. The program includes programming skills development, career mapping, aptitude and soft skills training and counseling. Through these various adapted methods, the students receive a holistic development that helps them build their own unique personality. Alongside providing quality education, KMIT also ensures that this education is useful to its student in whatever profession they wish to choose.

Apart from these two initiatives, the college constantly reinvents and innovates itself to comply with the need to maintain high quality education.

6.5.2 The institution reviews its teaching learning process, structures & methodologies of operations and learning outcomes at periodic intervals through IQAC set up as per norms

Response:

Example 1: Teaching Learning Reforms through Participatory Learning, Innovations, Co-curricular Activities.

At the beginning of every semester, the faculties come together for the faculty colloquium. In this meeting, the faculties discuss their course planning, delivery and assessment. Based on the course outcome given by the University, subject teachers prepare a schedule of 50 to 60 hours to deliver it. He/she also makes a day wise schedule of topics to be taught, methodology to be used, pedagogies and expected out of that lesson. Designed teaching and learning methods include lecture with interaction, quiz, demonstration through models, case based study and group discussion etc. The assessments of teaching and learning processes are being implemented to know the performance of students consistently as per course plan. These initiatives indicate the faculty to adopt best practice and can be benchmarked with other departments and institutions. A ten-minute power point presentation is given by every teacher summarizing actions. Outside experts are invited to assess and give their valuable feedback.

KMIT is in the process of adopting smart class room technology. As a part of this class rooms are equipped with LCD projector, a desktop system, WIFI service, Tessellator through WIFI/ LAN. These facilities enable learners to build knowledge and transform their learning into a product. The concept of smart classroom is not only made education interesting but also enhances student's performance. NPTEL and DELNET facility has been set up in the library to promote self learning.

Example 2: Co-curricular Activities and Students Development Programs

KMIT encourages students to be part of co-curricular activities and Students Development Programs. Students take up case studies, Internships and participate in Workshops, Competitions, etc. The Institution organized Conferences, Seminars, Orientation Programs, Guest Lectures, Skill Development Programs to widen the learning capabilities of faculties and students.

The Institute encourages collaborative learning between industry and academia as a means of reinforcing its curriculum with practical and real-world experiences. It is this emphasis, on a well-rounded education with a Technology-enabled environment that makes this institute a reputed and preferred institute. The teaching methodologies are improvised continuously on an ongoing basis by adopting several best practices, enabling the learning to happen by evolution rather by enforcement.

The internal Academic Audit is carried out regularly every month and any shortfalls identified are addressed from time to time. Some of the measures include submission of course handouts, monitoring of course delivery and assessment, remedial actions for slow learners, the timely conduct of project reviews, compliance with academic calendar and regulations and uniform course delivery and evaluation system for multi-section courses.

6.5.5 Incremental improvements made during the preceding five years (*in case of first cycle*) Post accreditation quality initiatives (*second and subsequent cycles*)

Response:

KMIT is taking continuous efforts for imparting quality education. The college adheres to a unique practice in education which has four basic frame works. These four frameworks form the foundation for teaching and also placements. Along with JNTUH B.Tech classes and labs, the college also implements

effective programs like TRISHUL, FINISHING SCHOOL and Research & Development. The incremental improvement made by institute during the preceding five years are given below.

During the academic year 2013-14, more programs are added to FINISHING SCHOOL (FS). FINISHING SCHOOL is a unique industry oriented program introduced in 2009 along with the regular University course work. During the 2nd semester of 3rd year B Tech Program students are trained in problem solving skills, algorithmic approach, technology skills C&DS, oops, java, SQL, OS, SE. Soft skills are also taught to the students with training in verbal ability, group discussions and interview techniques. Career guidance was also made the part of Finishing School.

With the number of sections in the college increased from 5 to 7, there was further improvement in FS activities. Training for BEC-Business English certificate approved by British council was also initiated. BEC has 3 levels of certification—BEC preliminary, BEC vantage, BEC higher process. Preliminary training in listening, reading, writing and speaking skills by certified trainers. In this academic year out of 360 students 158 students got placed in core industry with a maximum package of 6,00,000 per annum.

In 2014-15, another program TRISHUL was introduced. It deals with vocational training programs like Basic electrician course, Basic computer networking, Solar power system and web designing, Special training programs were conducted in the areas of Verilog, CADENCE, MATLAB/OCTAVE/EMBEDDED systems/DSP/&PHYTHON.

In 2015-16, MOU was signed with companies which focused on 'customized work force development (CWD). Students were trained in accordance with recruitments of the companies. In this academic year out of 540 students 298 students got placed in companies like Tech Mahindra, Virtusa-Polaris, Opentext, In RHYTHM solutions etc.

A special program SONET(School of New and Emerging Technologies) was initiated. As a part of this program students are trained on latest technologies like Salesforce, Data Science, Web security, NOSQL etc. A with a maximum package of Rs 24lakhs (ADOBE).

In 2016-17 new programs are added to SONET program like Unity, Blockchain. In this academic year out of 540 students 383 students got placed in companies like KONYLABS, ZENSAR,POLYCOM and Tech Mahindra.

The college took up special initiatives like GRIP (Graduate researcher's incubation program) and also coaching in GRE/TOEFL and research publications.

In 2017-18, an effective program was initiated by the college by the name Pre Finishing School(Pre FS). In Pre FS, identified slow learners are grouped into batches of 15 and are assigned to a mentor. Basics and prerequisites for Finishing school courses are taught in Pre FS.

Criterion 7 - Institutional Values and Best Practices

7.1 Institutional Values and Social Responsibilities

7.1.1 Number of gender equity promotion programs organized by the institution during the last five years

7.1.2

1. Institution shows gender sensitivity in providing facilities such as:

1. Safety and Security
2. Counselling
3. Common Room

Response:

Safety & Security:

KMIT provides a safe and secure environment to the students, faculty and non teaching staff with the cooperation of institute security personnel, city police, fire department and local communities.

Institute has appointed security team from an authorized Security Agency. They provide 24x7 security. They address the emergency issues and also provide assistance on any kind of security related duties. The security verifies and takes care of the check-in and check-out of institute visitors, vendors, student ID cards and vehicles.

The institution has fire extinguishers at appropriate places in each floor to address the fire incidences. KMIT has fire safety Audit for the buildings.

KMIT has a corporate hospital in its neighbourhood. The institute has First-Aid boxes in all the departments, Labs, security office and administrative office. Institute has a First Aid Medical room which is utilized for medical emergencies by staff & students.

The Institution has implemented Gender Sensitization course for all branches under curriculum of Jawaharlal Nehru Technology University Hyderabad.

Women Cell (WC):

Women cell has been constituted to empower the safety measures for female members in the Institution. The WC works to promote gender sensitivity in the Institution and produce harmonious atmosphere on the campus. It organizes workshops and sensitization programs both for staff and students by eminent Psychologists and social workers.

Functions of Women cell:

Identification of qualities like strong leadership and change making in girl students and building their capacity.

Organising the programs that empower women financially, mentally and emotionally. Provide opportunities that promote their growth as individuals in their own right.

To make them aware about the Supreme Court guidelines and to ensure that sexual harassment is treated as an unacceptable social behaviour within the institution and the society.

To conduct seminar, workshop to impart knowledge of opportunities and tools

available and train the women.

Roles and Responsibilities:

To promote a culture of respect and equality for female gender.

To conduct seminar, workshop to impart knowledge of opportunities and tools available and train the women.

To create a conducive counselling environment for female gender to share their problems.

To inculcate entrepreneurial attitude among young girls, scientists at the earliest so that they can be “job givers” rather than “job takers”.

Counselling: The Women cell also attends to the Grievances of the aggrieved students and deciphers their problems. All proceedings of the counselling shall be recorded.

The Cell will provide assistance to the Faculty/Institute for taking preventive steps in the matter of gender discrimination and sexual harassment.

Ms Kiran is an Independent and Professional Psychologist appointed by the KMIT to meet student counselling needs. She is available on every Friday – 2:00pm -4:00pm @ BhavishyaDwar. She is also available on phone call.

KMIT provides counselling to the students on regular basis to make them aware of:

Safety parameters for riding two wheelers.

Use of Aprons in labs for safety purpose.

Wearing formal shoes in Labs.

Common rooms: The institute provides common rooms for girls & boys, which are under security surveillance.

7.1.5 Waste Management steps including:

- Solid waste management
- Liquid waste management
- E-waste management

Response:

Solid waste management

The institution takes all measures required to ensure that the campus is free of waste items that harm the environment. All departments and classrooms are provided with dustbins for collection of wet and dry wastage which are emptied every morning and evening, thus maintaining the Campus by keeping it clean and green. Dried leaves and plant clippings are collected and segregated in compost pits to produce manure and which is used for gardening as organic manure to increase fertility of the soil.

Liquid waste management

At our campus, we treat waste water through sedimentation. The Sewage water from the entire campus is dispensed through the underground pipe lines.

E-waste management

All Electronic waste CPU's, Hard disks, Laboratory Equipment scrap is sent to the market for sale. Obsolete yet workable computers are donated. The cartridges of printers are refilled outside the college campus; UPS Batteries are recharged and repaired by the suppliers.

7.1.6 Rain water harvesting structures and utilization in the campus

Response:

Rainwater harvesting is the accumulation and storage of rainwater for reuse on-site, rather than allowing it to run off. The institute has rainwater harvesting facility at two locations in the campus. The rain water from the building roof is connected to one facility and the rain water from the open sky is sent to other facility.

Drain pits are used to sink the water and recharge the groundwater table. The huge volume of rainwater from the roof is collected. This water is used for ground water level improvement. The college emphasizes on the significance of water conservation and explains to all the students the importance of preserving and saving it. Students are encouraged to use water wisely and only when necessary. Students and staff act immediately upon witnessing any water wastage and take necessary action to stop it.

KMIT is committed to the initiative SAVE WATER.

7.1.7 Green Practices

- Students, staff using
 - a) Bicycles
 - b) Public Transport
 - c) Pedestrian friendly roads
- Plastic-free campus
- Paperless office
- Green landscaping with trees and plants

Response:

KMIT is committed to the clean and green environment. Green practices in the campus are carried out by students & staff by using

- a) Public Transport
- b) Pedestrian friendly roads
- c) Plastic-free campus
- d) Green landscaping with trees and plants

Public Transport:

KMIT, being centrally located in the city of Hyderabad, is accessible through public transport facility from every nook and corner of the city. Most of the staff and students utilize the public transport or come by walk to reach the college from their source point.

Pedestrian friendly roads:

The roads/pathways in KMIT are pedestrian friendly. The goal of these Pedestrian friendly roads is to encourage walking for leisure, recreation and health.

Plastic free Campus:

Plastic items are strictly not allowed in the campus. KMIT encourages students and staff not to use plastic bags. The security guard makes sure that no one enters the college campus with polythene bags. Awareness programs on the harmful effects of plastics are conducted regularly.

Green landscaping with trees and plants:

As KMIT gives importance for the cleanliness and eco friendly environment, the institution has taken number of initiatives such as green land scaping with trees and plants around the campus.

Wide range of plants and trees are grown in the campus are nurtured by gardeners. Organic vegetation, fruits and flowers are grown in the campus to promote healthy living. All the lawns are maintained with minimum consumption of water.

7.1.18 Institution organizes national festivals and birth / death anniversaries of the great Indian personalities

Response:

KMIT organizes and celebrates both National and cultural festivals.

Republic Day:

Republic Day honours the date on which the Constitution of India came into effect on 26 January 1950. Every year KMIT celebrates Republic day on 26th January by hoisting National Flag, organizing competitions to students, programs that inculcate patriotism in students, young India hosting is done. Sweets are distributed to all.

Independence Day:

Independence Day is annually celebrated on 15 August, as festival commemorating the nation's independence from the United Kingdom on 15 August 1947. The festival is celebrated with flag-hoisting ceremony and cultural events. Sweets are distributed to all.

Institute also gives importance to Birth/Death anniversaries of great Indian personalities. We celebrate Sardar Vallabhai Jayanthi, Gandhi Jayanthi, Dr B R Ambedkar Jayanthi, Mokshagundam Visvesvaraya Jayanthi etc. Students are encouraged to give speeches on universal values.

Teacher's day:

Teachers' Day is a special day for the appreciation of teachers, and include celebrations to honor them for their special contributions in a particular field area, or the community in general. The birthday of Dr. Sarvepalli Radhakrishnan (5 September) is also celebrated as Teacher's Day in India since 1962. On this day, Students felicitate their teachers. Special programs are arranged.

Engineer's day:

Every year, KMIT celebrates 15th September as **Engineer's day** as a remarkable tribute to the greatest Indian Engineer Bharat Ratna Mokshagundam Visvesvaraya. Various technical events, competitions will be conducted for students.

International Day of Yoga:

International Day of Yoga, or commonly and unofficially referred to as Yoga Day, is celebrated in KMIT annually on 21 June since its inception in 2015. Special Yoga session is organized on that day. Every day students and staff are encouraged to practice Yoga by Yoga trainer.

International Women's day:

International Women's Day (IWD) is celebrated on March 8 every year. It is a day that celebrates womanhood. We celebrate this day on 8th March every year. Every year a workshop will be conducted on The theme for International Women's Day. Girl students and female staff participate in various activities like workshops, Antakshari and Dumb charades.

Sankranti, Patangotsav:

It is celebrated every year in the month of January. Rangoli competitions, kite flying competitions are conducted to students and faculty.

Ugadi:

Every year, KMIT celebrates Ugadi, the Telugu New Year's Day. It is observed on the first day of the Hindu lunisolar calendar month of Chaitra, that falls in March or April of the Gregorian calendar.

Bathukamma:

Bathukamma is floral festival celebrated predominantly by the Hindu women of Telangana. Students and staff celebrate Bathukamma festival by preparing colorful Bathukammas, beautiful flower stacks, arranged with different unique seasonal flowers most of them with medicinal values, in seven concentric layers in the shape of temple gopuram.. KMIT invites local people to be part of the function.

7.1.19 The institution maintains complete transparency in its financial, academic, administrative and auxiliary functions**Response:**

The main criteria of education are to enlighten the truth, divinity in man to lead a moral and fruitful life in the world. It should essentially make a man pious, perfect and truthful. The enhancement of the quality of character is achieved only by the education.

KMIT maintains complete transparency in its financial, academic, administrative and auxiliary functions.

Financial functions:

The institution maintains transparency towards staff salaries by remitting the salaries in their bank account promptly and regularly.

Acquittance register is maintained by the Accounts section in the college duly signed by the staff every month for the salary paid.

Transparency is maintained by the institution regarding the fees paid by the students through issue of receipts for each and every fee collected such as the tuition fee, examination fee, miscellaneous fee etc.

The accounts section as well as the office in the institution is computerized to provide faster and more efficient performance with regard to financial tasks and service rendered to the staff, students and parents.

Academic functions:

All the academic activities are headed by the Principal assisted by the Heads of the Department and senior faculty.

Academic committee comprising of the Principal, Heads of the Department and senior faculty meet two times in a semester to discuss and decide on all the academic activities related to faculty requirement, class work, syllabus coverage, faculty performance, academic regulations, student feedback, infrastructural facilities, co-curricular and extracurricular activities.

Heads of the Department meeting is conducted by the Principal on a weekly/bi-weekly basis to discuss and decide on all the academic matters of the college.

Teachers are counseled by the department Head and/or Principal regarding measures to improve subject understanding and/or teaching skills

Administrative functions:

The administrative functions of the institution are taken care of in a sequential order by the Top Management comprising of the Chairman, Secretary and Correspondent and their team of governing body members, Principal and the Heads of the Department and the office.

Governing body of the college normally meets at least two times in a year to take decisions on: New programs of study, Infrastructure development of the Institute,

Approval of budget submitted by the finance committee, Medals, Prizes and certificates to be awarded to the students and other matters of importance.

Auxiliary functions:

Various co-curricular activities, debates, seminars and workshops are conducted for the students to make it sure that quality of education is maintained for their overall development. Students are the active partners in the college Programs. The students of the college also organize various cultural and other programs like KMIT EVENING, DANDIYA NIGHT of the college etc. kMITRA, College E-MAGAZINE is maintained by the students. KmitTV and Kmit Radio, the special initiative of KMIT to serve the students, local people, are by both students and faculty..

7.2 Best Practices

7.2.1 Describe at least two institutional best practices (as per NAAC Format)

Response:

Best Practice 1:

1. Title of the Practice:

Improve the employability of the students – Finishing School Program

1. Objectives of the Practice:

Train the students in Aptitude and Programming skills, latest technologies as per the needs and demands of the corporate world thereby improving the student placements.

1. The Context

There is a huge disconnect between the academic curriculum and needs of the industry. Finishing School program aims at bridging this gap. Students were unable to get job because they were unable to pass the recruitment tests of companies. We needed a program to prepare the students for these tests.

1. The Practice:

Finishing School program is a unique industry oriented program started by KMIT in 2010. KMIT is the first college in JNTUH to have started this program. It commences in the second semester of third year. Finishing School classes are held every day for 3 hours after the academic classes end. In Finishing School session students are taught problem solving skills using algorithmic approach.

Over two semesters FS students are taught C Programming, Data Structures, OOPS, JAVA, SQL, Operating Systems and Software Engineering. Along with technical skills students are also taught Aptitude and soft skills. Group discussions are held among students. Interview techniques are taught and mock interviews held.

1.Evidence of Success:

SNO	COMPANIES VISITED	NUMBER SELECTS	OF INTERNSHIP MONTH	PER CTC (LPA)

Hackadrone 2018– India’s first UAV Hackathon: KMIT’s team, Ms. Pragnya Kondrakunta, Ms.Fatima and Ms. Swapna Bhandari, developed and provided the winning solution.

- .

KMIT has organized an International Conference on Fog Computing and Internet of Things (ICFCIOT 2017) on December 21-22, 2017. It featured invited speeches as well as peer reviewed paper presentations.

-

There are several activities performed by Professional Activity Body.

-

Many students secured international certifications like OCJP, Hortonworks Hadoop Certified Developer: Java, Hortonworks Hadoop Certified Developer (HDPCD), HDP Certified Spark Developer - CERTIFIED BADGE, Salesforce Certified Force.com Developer (SP15), AEM 6 Developer Exam etc.

1.Problems Encountered and Resources Required

- Getting faculty to teach state of art techniques needed by recruiting companies was a challenge. KMIT reached out to industry and we are able to attract and get faculty with our purpose , compensation and work environment.
- Managing both academic program and Finishing school program in parallel was tough. We had built separate manpower and infrastructure for these programs.
- We had difficulty adjusting the academic timetable and Finishing school timetable.
- Getting soft skills faculty was not easy. We recruited full time soft skills faculty exclusively for Finishing School.
- Since it was a year long program , keeping the students motivated throughout the program was a challenge.
- Lot of effort was put to get reputed and big companies to come to KMIT and recruit our students.

Best Practice 2:

1. Title of the Practice:

Promote Social Awareness among the students

2. Objectives of the Practice:

Develop a sense of social and civic responsibility in students.

3. The Context:

Students are motivated to utilize the knowledge in understanding and finding practical solutions of community problems.

4. The Practice:

Along with imparting technical education KMIT thrives to inculcate social and civic responsibility in students. KMIT students in coordination with various organizations and NGOs organized various social activities.

5. Evidence of Success:

Activities conducted include:

Swaccha Bharat Abhiyan

Tree plantation

Blood donation Camp

In coordination with an NGO **Street Cause** distributed blankets to street dwellers; distributed school kits, Books, All Out refills (Mosquito Refills) and water bottles to children in an orphanage

Link: <https://www.facebook.com/Street-Cause-KMIT-162351097158139/>

KMIT organized an organ donation pledge campaign, powered by JeevanDan, at NIMS in Hyderabad. Along with organ donation pledge campaign, a camp was conducted to collect clothes and other items to distribute at an orphanage and old-age home.

Eco Ganesha mission is to promote eco friendly Ganpati Murthi by promoting clay idols (Murtis), to reduce pollution.

KMIT is a part of *SAKSHAM (Samkrakshan Kshмата Mahotsav)* an awareness campaign by the *Petroleum Conservation Research Association (PCRA)* under the Ministry of Petroleum & Natural Gas, Govt. of India. As a part of this month-long event, art forms such as painting, sketching, wall painting, etc. are conducted in educational institutions.

<http://kmit.in/emagazine/article/wall-memories-saksham-2k18/>

KMIT organized summer internship program in coordination with VOICE4GIRLS, a start-up social enterprise, whose mission is to enable marginalized adolescent girls in India to take charge of their futures by imparting critical knowledge, spoken English, and life skills through activity-based camps.

Computer Basics For Senior Citizens

KMIT has taken an initiative for training senior citizens on computer basics as it helps them in taking care of their day to day activities. Learning new skills at an older age is challenging, but at the same time it is empowering and boosts the confidence level in them.

Anti Ragging Rally

Keshav Memorial Institute of Technology organized an “Awareness rally on Anti ragging” in the college premises. Students have participated with placards, pictures, banners appealing the society to have a strict orientation towards the ragging and to report ragging at their Face book page-“Anti-ragging cell-Hyderabad”. More than 150 students participated in the rally. Students taken up slogan as “LET SAY NO TO RAGGING”

AIRTEL HYDERABAD MARATHON

Since 2015, KMIT is supporting AIRTEL HYDERABAD MARATHON by sending around 150 volunteers to the marathon. The course starts from People’s plaza and ran through to Gachibowli stadium. It was a successful event to both the managing team and the runners.

1. Problems Encountered and Resources required

Major problems faced in making the students as socially responsible persons include motivation, sustained involvement of students and staff, time constraints and mobilization of students. Based on the social background of students there is a significant variation in the mind set of students. Mobilization of financial resources is the challenge faced by the students.

1. Title of the Practice

This title should capture the keywords that describe the practice.

2. Objectives of the Practice

What are the objectives / intended outcomes of this “best practice” and what are the underlying principles or concepts of this practice (in about 100 words)?

3. The Context

What were the contextual features or challenging issues that needed to be addressed in designing and implementing this practice (in about 150 words)?

4. The Practice

Describe the practice and its uniqueness in the context of India higher education. What were the constraints / limitations, if any, faced (in about 400 words)?

5. Evidence of Success

Provide evidence of success such as performance against targets and benchmarks, review results. What do these results indicate? Describe in about 200 words.

6. Problems Encountered and Resources Required

Please identify the problems encountered and resources required to implement the practice (in about 150 words).

7. Notes (Optional)

Please add any other information that may be relevant for adopting/ implementing the Best Practice in other institutions (in about 150 words).

Any other information regarding Institutional Values and Best Practices which the university would like to include.

7.3 Institutional Distinctiveness

7.3.1 Describe/Explain the performance of the institution in one area distinctive to its vision, priority and thrust

Response:

The institution has the vision “**To be the fountain head in producing highly skilled, globally competent engineers**”, equipped with academic and technical knowledge in different disciplines, providing emphasis on latest technological advances.

KMIT, since its inception has laid emphasis on making the students industry ready. Along with the University academic curriculum KMIT made its students learn the technologies of the day. As a part of this, over a period of time KMIT has introduced various add-on programs. These include **TRISHUL**, **FINISHING SCHOOL**, **SONET** and **ARJUNA**.

In the year of inception, 2007 along with academic curriculum KMIT has started an add-on program **TRISHUL** targeting 1st year students. The idea behind this program is to develop the students in communication skills and in preparing the students in advanced concepts within the subjects of the curriculum. In the first year of **TRISHUL**, students were exposed to Advanced C programming and special classes were conducted to improve their Communication skills. In its second year KMIT, as a part of **TRISHUL**, students were trained in Advanced Java Programming. In the later years, students have been exposed to latest web technologies.

In 2009 KMIT has started **FINISHING SCHOOL**. The idea behind this program is to train the students for industry placements by training them in Aptitude and Software programming.

The first batch students attended the placement drives in 2010 and around 150 students got placed in around 30 companies with average package of 2.75 Lakhs. The efforts of KMIT in providing the placement can be observed with increase in the number of students placed, number of companies visiting the campus and increase in the maximum offer and average offer as show in the figures.

In 2011 **Customised Workforce Development (CnD)** was started to train the students in the latest technologies as per the requirement of Industry. Special classes were conducted to train the students in Oracle Application, Android, IOS Programming etc.

In 2013 KMIT has started School of New and Emerging Technologies (**SONET**). **SONET** trains 2nd and 3rd year B.Tech students on latest technologies viz Websecurity, Salesforce, Data Science/Machine Learning, Hadoop, AEM, Blockchain, Unity, Internet of Things (IOT). Initial batches were trained in Websecurity, Salesforce, Oracle Cloud12c and NOSQL. In 2015 four more technologies were added to **SONET** programs. These were Data Science/Machine Learning, Hadoop, IOT and AEM. In 2016 Blockchain and Unity were added to the list of training programs.

In addition to providing exposure to latest technologies, students are encouraged to appear for international certification examinations.

In 2013, KMIT has signed MOU (Memorandum of understanding) with Zensar Technologies. Under this MOU, every year Zensar Technologies trains students and faculty on **ERP** (Oracle Apps). In 2014 MOU included training the students and faculty on Software Testing along with **ERP** (Oracle Apps). In 2016 training on **Salesforce** was also included.

In 2015, KMIT has signed MOU with Virtusa and under this MOU every year Virtusa trains students and faculty on Data Science and Adobe Experience Manager (A.E.M). Virtusa has established a centre of excellence (COE) in KMIT and was inaugurated Virtusa Vice President and Recruitment team in the year 2016. Exclusive lab has been established in KMIT. All the training programs will be conducted in that lab. Virtusa added KMIT to do training on Adobe Analytics. RPA is also added in 2017. Two faculty members from KMIT got certified in RPA, one in AEM and 2 in Data Science.

In the year 2016 KMIT has started **ARJUNA** program. As part of this program students are given a set of programmatic problems at the beginning of every week and they are expected to upload the solutions for them online. Post evaluation two fastest/best solutions are considered for 1st, 2nd, 3rd and 4th year respectively and given **ARJUNA** award with a cash amount of 2500/- at the end of the week. To encourage active student participation, an **ARJUNA** awardee is not eligible for the same for the following 4 weeks.

5. CONCLUSION

Additional Information :

The institute has a unique feature, the founder, the director and the visionary of the college takes keen interest in the teaching process. He takes classes, teaches, encourages and inspires the students to learn and excel. The finishing school training is keenly monitored by him.

The institute also encourages the students to learn various things in the Addon courses. The first year classes and the Addon courses are taught by the experienced faculty so that the students get appropriate tuning. The extra activities are all pro- curriculum and are able to enthuse the students.

Every Wednesday evening all sports utilities are exclusively for girl students only.

Concluding Remarks :

Keshav Memorial Institute of Technology, KMIT with its effective planning, efficient work force, state of the art infrastructure is able to produce engineers, proficient in the core subject and having excellent employability skills. The Institute is making an incessant progress at a steady pace in all the areas. The Governing body, the teaching faculty, faculty and supporting staff all diligently work in unison to fulfil the vision and mission of the institute.

The governing body, year after year takes measures to improve the teaching standards, it understands, that with the advent of technology and because of unforeseen circumstances, it has to customise the steps and policies so as to propel the institute towards achieving the vision and mission of the institute. The governing body is of the opinion that practical insight is indispensable in achieving the vision of the institute.

The key areas which establish the achievement of the institute are the Finishing School, SONET and the Placement cell.

The aim of education is the refinement of body and soul, the students by the time they graduate inevitably , receive complete refinement the curriculum subjects, practical labs make them learn understand the core subjects, the co-curricular and extra -curricular activities teach them team work, team spirit and the sportsman spirit.

The institute opens various avenues for the students and in accordance with their interest, the students can select their own avenues after their graduation. KMIT is thus able to stand up to the expectations of the society, parents and students without cutting corners.
